Information Technology in a Global Society is the first textbook written specifically for the new IB ITGS syllabus, covering IT systems, social impacts and ethical issues, and each area of application. The text provides engaging content that blends clear examples of technical concepts with consideration of social issues. Discussion points for extended independent learning and complete, modern examples are included to enhance teaching and understanding, and ensure students get the best possible experience from the ITGS course. A free sample chapter is available on the book's web site, www.itgstextbook.com. Textbook features include: Clear objectives for each chapter, tied directly to the ITGS syllabus, so you can be sure that all aspects of the course are being covered. Course content is explained through clear and up to date examples, plus historical context. Over 200 varied exercises, mixing ethical discussion points, classroom exercises, practical activities, and exam style questions to cover the syllabus content from a variety of assessment angles. Theory of Knowledge (TOK) links are included, enabling integration with the IB core hexagon. Common mistakes and misconceptions are highlighted so students can avoid them. Key language review for every chapter, plus a complete glossary of ITGS terminology. Over 300 diagrams, photographs, and illustrations to bring topics alive. Fully cited examples in every chapter mean students can extend their learning with wider reading-an essential part of IB courses. Free online support to extend learning with additional case studies, links, and activities (www.itgstextbook.com).

This work demonstrates how inquiry can look and sound in the early years of Primary Years Programme (PYP), helping teachers recognize, guide, and deepen their students' wonderings in valuable ways.

An ideal reference guide to introducing the IB Diploma in your school.

From IB Publishing, in cooperation with Hodder Education. Help students to understand the key and related concepts and build the skills they need to reach the highest level of the assessment criteria. IB Skills is an innovative new series of resources for years 4 and 5 of the MYP. These resources aim to: - introduce students to key and related concepts that are relevant within and across the subject areas - develop interdisciplinary and disciplinary skills that are essential to the understanding of both concepts and subject content - help students to understand key features of the MYP-global contexts, approaches to learning (ATL), inquiry and reflection. These practical, subject-specific guides include a wide variety of topics designed to engage and motivate students. Each chapter in the books is designed to deepen conceptual understanding and to allow students to practice the skills that they will need to reach the highest level of the assessment criteria.

Do the demands of carrying out research in today's high-tech environment leave you baffled? Did the grade on your last term paper leave you doubting that getting an education was worth the effort? As a student in higher education, do you long for a simple, comprehensive guide to research? Here it is. Now in its third edition, extensively revised and 32-percent larger than the second edition, "Research Strategies" is your indispensable guide to informational research. With his concise, empathetic, witty manner, William Badke shows you that research does not need to be painful. You'll learn the skills that are essential to the success of any research project so that you can take control of the research process and make it work for you. "Research Strategies" is as friendly as a puppy, as informative as your friend's Facebook account, and as helpful as a personal servant. Don't start your research project without it.

This United States-focused anthology on gender focuses on women and men and the multiple identities that comprise the lives of individuals across gender. Drawing from a wide range of sources including research articles, essays, and personal narratives, Disch has chosen accessible, engaging, and provocative readings that represent a plurality of perspectives and experiences. Eleven part introductions briefly identify important issues in the general field of study, describe the readings, identify the central themes emerging throughout the book, and raise questions for students to consider.

The global population is increasing rapidly, and feeding the ever-increasing population poses a serious challenge for agriculturalists around the world. Seed is a basic and critical input in agriculture to ensure global food security. Roughly 90 percent of the crops grown all over the world are propagated by seed. However, seed can also harbour and spread pathogens, e.g. fungi, bacteria, nematodes, viruses etc., which cause devastating diseases. Seed-borne pathogens represent a major threat to crop establishment and yield. Hence, timely detection and diagnosis is a prerequisite for their effective management. The book "Seed-Borne Diseases of Agricultural Crops: Detection, Diagnosis & Management" addresses key issues related to seed-borne/transmitted diseases in various agricultural crops. Divided into 30 chapters, it offers a comprehensive compilation of papers concerning: the history of seed pathology, importance of seed-borne diseases, seed-borne diseases and quarantine, seed health testing and certification, detection and diagnosis of seed-borne diseases and their phytopathogens, host-parasite interactions during development of seed-borne diseases, diversity of seed-borne pathogens, seed-borne diseases in major agricultural crops, non-parasitic seed disorders, mechanisms of seed transmission and seed infection, storage fungi and mycotoxins, impact of seed-borne diseases on human and animal health, and management options for seed-borne diseases. We wish to thank all of the eminent researchers who contributed valuable chapters to our book, which will be immensely useful for students, researchers, academics, and all those involved in various agro-industries.

Humorously describes ways to design, build, and maintain effective Web sites, including criticism of Web sites the authors feel are poorly designed.
