From the bestselling author of *Women Who Think Too Much*, a groundbreaking self-improvement program that empowers women. Women are extraordinarily hard on themselves. They scrutinize their flaws, asking "Am I a good lover? A good mother? Successful in my career?" They get preoccupied with ways they do not measure up, twisting themselves into knots to fix problems no one else can see. *The Power of Women* from award-winning and bestselling psychologist Susan Nolen-Hoeksema shows women how to break this cycle-by discovering and utilizing their unique psychological strengths. Drawing on original research and the instructive stories of real people, Nolen-Hoeksema identifies the skill sets that women, based on their biology and social

roles, bring to challenges: - Mental strengths, such as the instinct to manage scarce resources - Identity strengths, which maintain strong values under pressure emotional strengths, such as anticipating the effects of decisions relational strengths, with an emphasis on win-win solutions Combined, these strengths give women a powerful ability to lead during transformational times. She then provides hands-on assessments for pinpointing strengths with the most relevance to a problem, exercises for building strengths, and inspiring examples of women's inventiveness, resilience, and sheer determination. This revolutionary book of self-improvement gives women the tools to hone their skills as entrepreneurs and managers, mothers and wives, mentors and community

# Read Book Abnormal Psychology 5th Edition

leaders-and as individuals pursuing their talents and dreams.

Case Studies in Abnormal Psychology presents a broad range of cases drawn from the clinical experience of authors Kenneth N. Levy, Kristen M. Kelly, and William J. Ray to take readers beyond theory into real-life situations. The authors take a holistic approach by including multiple perspectives and considerations, apart from those of just the patient. Each chapter follows a consistent format: Presenting Problems and Client Description; Diagnosis and Case Formulation; Course of Treatment; Outcome and Prognosis/Treatment Follow-up; and Discussion Questions. Providing empirically supported treatments and long-term follow-up in many case studies gives students a

# Read Book Abnormal Psychology 5th Edition

deeper understanding of each psychopathology and the effects of treatment over time.

From one of the nation's preeminent experts on women and emotion, a breakthrough new book about how to stop negative thinking and become more productive. It's no surprise that our fast-paced, overly self-analytical culture is pushing many people—especially women—to spend countless hours thinking about negative ideas, feelings, and experiences. Renowned psychologist Dr. Susan Nolen-Hoeksema calls this overthinking, and her groundbreaking research shows that an increasing number of women—more than half of those in her extensive study—are doing it too much.

# Read Book Abnormal Psychology 5th Edition

and too often, hindering their ability to lead a satisfying life. Overthinking can be anything from fretting about the big questions such as "What am I doing with my life?" to losing sleep over a friend's innocent comment. It is causing many women to end up sad, anxious, or seriously depressed, and Nolen-Hoeksema challenges the assumption-heralded by so many pop-psychology pundits of the last several decades-that constantly expressing and analyzing our emotions is a good thing. In *Women Who Think Too Much*, Nolen-Hoeksema shows us what causes so many women to be overthinkers and provides concrete strategies that can be used to escape these negative thoughts, move to higher ground, and live more productively. *Women Who Think Too Much* will change lives and is destined
