This novel resource for course content review of pediatric nursing and NCLEX-RN preparation features a potent learning technique, the use of unfolding case studies to enhance critical thinking skills and enable students to think like a practicing nurse. Covering both basic and advanced nursing concepts of caring for children and families, this format embeds required content into compelling, real-life scenarios that evolve over time. These unfolding case studies are of particular value because they closely mimic real-life situations in nursing and provide situational mental models that assist students with problem-solving and critical thinking techniques. All content areas required for NCLEX-RN success are interwoven in an enjoyable format that dispels the drudgery of straightforward memorization. A variety of NCLEX-style questions are used throughout the book to familiarize students with the exam format and to help them assess their own learning. The book includes engaging eResources for enriched learning experiences. It will also be of value to faculty as a make-up guide for students who miss clinical hours, and as a reference for scenarios with standardized patients or role-play situations. **Key Features:** Uses unique unfolding case study method that embeds basic and advanced pediatric nursing care concepts Promotes active learning and knowledge retention Helps to foster problem-solving and critical thinking techniques Provides all types of NCLEX-style questions for exam preparation Includes eResources throughout for enhanced learning opportunities

This book provides two thousand multiple choice questions on human anatomy and physiology, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However not all possible information is provided within these Introductions, so an

Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in examinations for undergraduate introductory courses and as such reflect the focus of these particular courses and are pitched at the level to challenge students that are beginning their training in anatomy and physiology. The questions and answer combinations are to be used both by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition & dietetics, health sciences and students taking an anatomy and physiology course as an elective.

With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice of surgery as outlined within Bailey & Love. Sub-divided into 13 subject-specific sections, both MCQs and EMQs provide a comprehensive coverage of the surgical curriculum as well as the core learning points as set out in Bailey & Love: Each section emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles, while while taking into account the latest developments in surgical practice. MCQs and EMQs in Surgery is an excellent companion to Bailey & Love and provides a valuable revision tool for those studying for MRCS.

A revision aid for radiology trainees world-wide studying for their professional examinations in the field.
