### Basis Trading Strategies and Returns to Storage

Basis trading is a financial arbitrage trading strategy that involves the trading of a financial instrument, such as a financial derivative or a commodity, with the motive of profiting from the apparent mispricing of the securities. Basis trading is carried out of the perception or when the trader is of the opinion that the securities that they invested in are mispriced.

### Basis Trading - Overview, How It Works, Leverage

Paired t-test results indicate that corn basis trading at harvest and pre-spreading at 150% cost of carry level at pre-harvest time yield statistically similar mean net returns to post-harvest storage (up to 185 days), whereas other corn pre-spreading levels such as 125% and 100% yield significantly lower mean net returns. In addition, basis trading corn results in lower net returns variance than storing it un-hedged, and hence, a less risky post-harvest strategy.
