Beyond the Blue Horizon: Myths and Legends of the Sun ...

"Beyond the Blue Horizon" is a 1930 song composed by Leo Robin, Richard A. Whiting, and W. Franke Harling, and was first performed by Jeanette MacDonald in the 1930 film Monte Carlo. It was released B-side that November as a single on a 78 rpm disc along with the song "Always, in All Ways" under the RCA Red Seal label. Four takes were recorded on August 4 at the Hollywood Recording Studio, conducted by LeRoy Shield, with MacDonald and the vocal group The Rounders; the second take was chosen for

Students are encouraged to appreciate the magic in myth and science, as well as the commonality of all human experience with nature. Grades 4-8.

The starry night sky has always filled us with wonder. Down through the ages we have looked to the skies for guidance from the images of our heroes, gods, and monsters. Storytellers have illustrated their mythologies and legends with it, passing on to future generations the customs of their people. Many of these stories have survived to the present. In this Skylore from Planet Earth we explore some of the stories about COMETS & METEORS. People from the entire planet have looked to it for a reminder of their own traditions. Fifteen richly illustrated stories take the reader on a trip around the world, giving a glimpse into the histories and cultures of the planet's early civilizations. The six books in this series feature sky phenomena as seen from early cultures around the world. Read stories about the constellation ORION; the star cluster PLEIADES; our galaxy, MILKY WAY; the planet, VENUS; and this final book, COMETS & METEORS.

The starry night sky has always filled us with wonder. Down through the ages we have looked to the skies and have seen images of our heroes, gods, and monsters. Storytellers have illustrated their mythologies and legends with it, passing on to future generations the customs of their people. Many of these stories have survived to the present. In this Skylore from Planet Earth we explore some of the stories about the star cluster PLEIADES. Since The Pleiades is located almost directly over the earth's equator, people from the entire planet have looked to it for a reminder of their own traditions. Fifteen richly illustrated stories take the reader on a trip around the world, giving a glimpse into the histories and cultures of the planet's early civilizations. Six books in this series will feature other sky

phenomena as seen from early cultures around the world. Read stories about the constellation ORION (available now), the planet VENUS, our MILKY WAY GALAXY, the SUN, and the MOON.

A guide to solar eclipses for the general public with detailed coverage of the 2017 and 2024 total eclipses over the U.S, discussing how, when, and where to see the coming total solar eclipses, how to photograph and video record them, and how to do so safely.

There are eight seasonal festivals (referred to as sabbats) that make up the "Wheel of the Year". "Dancing the Sacred Wheel" draws on the author's own personal experience of following a traditional Pagan spiritual path and creating ritual over 20 years in southern Australia. Combining traditional Pagan lore with history in order to develop a relationship with her local environment, the author also offers invaluable pointers as to how to incorporate the localised elements into something that also provides a "traditional" feel. "Dancing the Sacred Wheel" not only provides an in-depth look the folklore and myth associated with each sabbat, but also discusses ways of creating specific rituals and observances that acknowledge each seasonal "gateway" when the local environment is reflecting something completely different. "Dancing the Sacred Wheel" challenges the reader, regardless of which hemisphere they reside, to draw inspiration from their environment, and to create their own unique Wheel of the Year.

A collection of tales from around the world relates the significance of the constellations to different cultures

Comprehensive and cross-referenced, this informative volume is a rich introduction to the world of nature as experienced by ancient peoples around the globe. 51 halftones.

The African continent is home to a fascinating and strong tradition of myth, due in part to the long history of human habitation in Africa; the diversity of its geography, flora, and fauna; and the variety of its cultural beliefs. African Mythology A to Z is a readable reference to the deities, places, events, animals, beliefs, and other subjects that appear in the myths of various African peoples. For the first time, this edition features full-color photographs and illustrations. Coverage includes:

The Japanese have faithfully preserved their ancient myths as a connected and well ordered system. And as a system, Japanese myths say much about the human condition in the cosmos and about the human place in the cosmic order. Not until now has a book-length, English-language study been released on Japanese mythology. Drawing on his meticulous research, Asianist Peter Metevelis presents this selection of analytic essays that form a mosaic of themes on the primordial world of Japanese myth, adding a rewarding voice to cultural history and the history of ideas around the world. Metevelis shows that, contrary to popular belief, Japanese myths have much in common with other myths around the globe, and are mythically, logically, and symbolically equivalent. This suggests that Japanese culture has always resonated with the rest of the world and provides a valuable touchstone for comparative mythologists. The mythic themes Metevelis explores include: Linkage of birth with death Loss of immortality Containment of souls Effect of time on mortals Creation of the cosmos And many more This incomparable volume also includes detailed notes, bibliographies, and appendices to help further your knowledge of Japanese myth. Under Metevelis's guidance, you can expand your understanding of the Japanese myth system, its structure, and its principal actors, and immerse yourself in the ancient Japanese mysteries of the cosmos.
