Beer Making Tips: When you have been brewing for many years, the process, the quantities and the timings are second nature. But most will have a few disaster stories to tell, especially in the early days. These simple tips will help the beginner to produce good beer right from the get go. 1. CLEANING: Cleaning is vital. Clean and sterilise your equipment to keep bacteria and yeast at bay.

Tips For Brewing The Best Beer

Boil a cup (250mls) of water for 5 minutes and then pour it into a sterilized container. Wait for the water to cool down to at least 80°F/27°C and sprinkle your packet of yeast over the top. Leave this for about 15-30 minutes, when you should start to see it get nice and foamy.

Empty the can of malt into the brewing bucket. This is normally best done by immersing the can in hot water to soften the malt which makes it easier to pour out. Then rinse the can with hot water to remove any remains. Depending on which kit you are making it might be necessary to add some Brewing or granulated Sugar.

Beginners Guide to Beer Making - Love Brewing

I made a simple counter-current heat exchanger to cool my beer while I siphon it out of the brew kettle and into my fermenting bucket. I made the unit by fitting a 20' long 1/4" copper tube into an old (or new) garden hose: wort travels down inside the copper tubing while cold tap water passes up around the copper tube inside the garden hose.

Ten Top Tips for Home Brewing Beer | Home Brewing Beer ...

One of the best ways to reduce the likelihood of your beer getting contaminated is to chill the wort as fast as possible, dropping the temperature from that dangerous range that evil bacteria just love. Many beginning homebrewers accomplish this by submerging the brew kettle in an ice bath in either a large tub or the bathtub.

10 Tips for Beginning Homebrewers | Craft Beer & Brewing

If you have cooled the beer prior to bottling you will need less sugar to achieve the same level of co2 in the final beer. 8. Don't rack of the yeast too early. Once the beer has finished fermenting, ie reached terminal gravity, make sure you leave the wort on the yeast for a couple of days.
