The World's 18 Strangest Bridges: Gallery

The designer should have first seen and studied many bridges in the course of a long learning process in order to design a bridge. He should know what type of beam may be suitable in the available conditions, either a beam bridge an arch bridge or a suspended one. He should also know the influence of foundation conditions on the choice of spans and structural systems etc. hence, the designer of the bridge should not only be a learned person but also an experienced one.
