Your cannabis cultivation plan needs to ensure that the plants are exposed to optimal lighting conditions in every stage of their life. Greenhouses are excellent choices since they take advantage of longer natural lighting cycles, reducing energy expenditure.

Cannabis Cultivation Planning Best Practices - GrowerIQ.ca

Marijuana is a pretty hardy plant, and there's a reason why it's called "weed"! However, to best ensure the success of your crop, you need to consider these aspects of your space: Light: Growing marijuana requires periods of complete darkness to simulate a natural outdoor grow cycle. Be sure that your grow space can be completely darkened, whether that means converting a room for that purpose or simply using a grow tent specifically designed for marijuana growing.

Best Practices for Growing Marijuana | Leafbuyer

Precision agriculture integrates new technologies with the agronomic experience to intelligently manage the high spatial variability of all agricultural variables and the time scales at which these variables change. The right application of this approach increases the size and quality of the agricultural production; saves resources; improves environmental quality; helps to achieve self-sufficiency, food security, and agricultural sustainability; increases exports; and more. Precision Agriculture Technologies for Food Security and Sustainability is an essential reference source that compiles a comprehensive, multidisciplinary review of current research in the field of precision agriculture. It also discusses cutting-edge tools and models that can help facilitate and improve the systems implementation. Featuring coverage of a wide range of topics including agronomy, public policy, and internet of things, this book is ideally designed for agriculturalists, government officials, economists, environmentalists, academicians, researchers, students, and engineers in the fields of electronics, ICT, and agriculture.

Learn how to achieve top yields to maximize profits. This 2011 edition offers the latest information and strategies for alfalfa establishment, production, and harvest. Includes many color photos and charts.

"The purposes of this guide are to provide information to Soil Conservation Service (SCS) Field Office Personnel on the control of nonpoint sources of pollution from agricultural lands and to incorporate a water quality perspective into all conservation planning. Nonpoint source pollution is both a relatively concern and a complex phenomenon with many unknowns. Knowing the extent to which agricultural sources contribute to the total pollution load, the extent to which various control practices decrease this load, and the effect of reducing the pollutants delivered to a water body are basic to the achievement of water quality."--Page 3.

Make informed decisions about the benefits of using cannabis Pot is hot-for good reason. To date, 30 states have legalized medical marijuana to the tune of nearly \$11B in consumer spending. Whether it's to help alleviate symptoms of an illness or for adults to use recreationally, more people every day are turning to marijuana. Cannabis For Dummies presents the science behind the use of this amazingly therapeutic plant. Inside, you'll find the hands-on knowledge and education you need to make an informed decision about your cannabis purchase, as a patient and a consumer. Decide for yourself if marijuana is right for you Manage aches and pains Gain insight on the effects and possible symptom relief Enjoy both sweet and savory edibles Navigate the legal requirements If you're curious about cannabis, everything you need to discover its many benefits is a page away!

A wide range of pests, diseases, and nutrient deficiencies can zap the vitality of any cannabis garden. Inexperienced gardeners often rely on pesticides that are not registered for edibles, as well as other harmful or ineffective techniques that can render plants unusable. This resourceful guide comes to the rescue, showing gardeners how to win back a garden and nurture plants to their full potential, using safe, organic, and integrated pest management techniques. In addition to providing readers with the know-how to get their plants healthy, Marijuana Pest and Disease Control highlights design and garden practices to prevent future infections. Author Ed Rosenthal gears the book to gardeners at every level of experience and in any growing situation from indoor, outdoor, and greenhouse to hydro and terrace gardens. Extensive color photographs and illustration help identify the exact problem.

R. Backer provided editorial input and coordinated much of the development of the Research Topic and the editorial activities associated with it. She also wrote the first draft of the editorial manuscript and managed the final development of this paper.

Michael Zaytsev's writing has been published in Entrepreneur, Forbes, International Business Times, & more. For more information or to contact Mike Z, visit www.MichaelZaytsev.com

Hemp and cannabis, both belonging to Cannabis sativa, have emerged as some of the most valuable crops because of their multiple functionalities - industrial, medicinal, and recreational uses. Like all other crops, they are at risk of diseases and pests. In certain cases, an entire hemp field can fail due to unexpected disease. As a new and highly regulated crop, research on Cannabis crop diseases is scarce, and the science of plant diagnostics is not well covered in the literature. Taking hemp/cannabis as a model crop, the book illustrates how to diagnose a disease problem and how to manage it effectively. It presents real disease cases encountered during crop production, and explains methods of diagnosis, both in the field and in the lab, in order to find out the cause(s).

The production of this manual is a joint activity between the Climate, Energy and Tenure Division (NRC) and the Technologies and practices for smallholder farmers (TECA) Team from the Research and Extension Division (DNR) of FAO Headquarters in Rome, Italy. The realization of this manual has been possible thanks to the hard review, compilation and edition work of Nadia Scialabba, Natural Resources officer (NRC) and Ilka Gomez and Lisa Thivant, members of the TECA Team. Special thanks are due to the International Federation of Organic Agriculture Movements (IFOAM), the Research Institute of Organic Agriculture (FiBL) and the International Institute for Rural Reconstruction (IIRR) for their valuable documents and publications on organic farming for smallholder farmers.
