b) It is easier for small molecules to diffuse across the cell membrane.

~~Cell Transport Test Review Questions (ID: 18229)~~

A selectively permeable cell membrane is one that allows certain molecules or ions to pass through it by means of active or passive transport. Explain two functions of the cell membrane. The cell membrane is a very important structure which functions to allow certain substances to enter or leave the cell.

~~Denton Independent School
District / Overview~~

In addition to allowing transport of specific material across the membrane, protein in the membrane also function as an anchor for the cytoskeleton, a scaffold made of microfilaments, intermediate filaments, and microtubules. It provides stability to the cell and allows for intracellular transport, or movement of objects inside the cell, such ...
