This chapter works with the first topic: the languages used in WordPress programming. These are HTML, CSS, PHP, and (optionally) JavaScript. If you have a basic knowledge of these languages—enough to understand the text and examples below—you should be good to go.

The Four Languages You Must Know to Understand WordPress ...

Clipper is an xBase compiler that implements a variant of the xBase computer programming language. It is used to create or extend software programs that originally operated primarily under MS-DOS. Although it is a powerful general-purpose programming language, it was primarily used to create database/business programs. One major dBase feature not implemented in Clipper is the dot-prompt interactive command set, which was an important part of the original dBase implementation. Clipper, from Nantu

Clipper (programming language) - Wikipedia

The project is for troubleshooting a website programming for an online art project. It will be launched this Wednesday, but there are some browser compatibility issues. The amateur programmer built up the website using Firefox. But a particular page looks different and odd on Chrome currently.
