[Collected Works of C.G. Jung, Volume 18: The Symbolic Life: Miscellaneous Writings](#) C. G. Jung This volume is a miscellany of writings that Jung published after the Collected Works had been planned, minor and fugitive works that he wished to assign to a special volume, and early writings that came to light in the course of research.

For the first time, The Collected Works of C. G. Jung is now available in a complete digital edition that is full-text searchable. The Complete Digital Edition includes Vols. 1–18 and Vol. 19, the General Bibliography of C. G. Jung's Writings. (Vol. 20, the General Index to the Collected Works, is not included.) Volumes 1–18 of The Collected Works are available for individual purchase and are also full-text searchable at <http://press.princeton.edu/catalogs/series/bscwj.html> [The Collected Works of C.G. Jung]. The Collected Works of C. G. Jung forms one of the basic texts of twentieth-century thought: at once foundational for depth psychology and pivotal for intellectual, cultural, and religious history. The writings presented here, spanning five decades, embody Jung's attempt to establish an interdisciplinary science of analytical psychology, and apply its insights to the fields of psychiatry, criminology, psychotherapy, psychoanalysis, personality psychology, anthropology, physics, biology, education, the arts and literature, the history of the mind and its symbols, comparative religion, alchemy, and contemporary culture and politics, among others: each in turn has been decisively marked by his thought. Of timely and ongoing relevance to the understanding of these fields, Jung's writings are at the same time essential reading for any understanding of the making of the modern mind.

Nine essays, written between 1922 and 1941, on Paracelsus, Freud, Picasso, the sinologist Richard Wilhelm, Joyce's Ulysses, artistic creativity generally, and the source of artistic creativity in archetypal structures.

One of the most important of Jung's longer works, and probably the most famous of his books, Psychological Types appeared in German in 1921 after a "fallow period" of eight years during which Jung had published little. He called it "the fruit of nearly twenty years' work in the domain of practical psychology," and in his autobiography he wrote: "This work sprang originally from my need to define the ways in which my outlook differed from Freud's and Adler's. In attempting to answer this question, I came across the problem of types; for it is one's psychological type which from the outset determines and limits a person's judgment. My book, therefore, was an effort to deal with the relationship of the individual to the world, to people and things. It discussed the various aspects of consciousness, the various attitudes the conscious mind might take toward the world, and thus constitutes a psychology of consciousness regarded from what might be called a clinical angle." In expounding his system of personality types Jung relied not so much on formal case data as on the countless impressions and experiences derived from the treatment of nervous illnesses, from intercourse with people of all social levels, "friend and foe alike," and from an analysis of his own psychological nature. The book is rich in material drawn from literature, aesthetics, religion, and philosophy. The extended chapters that give general descriptions of the types and definitions of Jung's principal psychological concepts are key documents in analytical psychology.

Five long essays that trace Jung's developing interest in alchemy from 1929 onward. An introduction and supplement to his major works on the subject, illustrated with 42 patients' drawings and paintings.

Essays which state the fundamentals of Jung's psychological system: "On the Psychology of the Unconscious" and "The Relations Between the Ego and the Unconscious," with their original versions in an appendix.

Essays bearing on the contemporary scene and on the relation of the individual to society, including papers written during the 1920s and 1930s focusing on the upheaval in Germany, and two major works of Jung's last years, The Undiscovered Self and Flying Saucers. ?

This book gives the substance of Jung's published writings on Freud and psychoanalysis between 1906 and 1916, with two later papers. The book covers the period of the enthusiastic collaboration between the two pioneers of psychology through the years when Jung's growing appreciation of religious experience and his criticism of Freud's emphasis on pathology led, with other differences, to his formal break with his mentor.

This volume is a miscellany of writings that Jung published after the Collected Works had been planned, minor and fugitive works that he wished to assign to a special volume, and early writings that came to light in the course of research.

In 1911 Jung published a book of which he says: '...it laid down a programme to be followed for the next few decades of my life.' It was vastly erudite and covered innumerable fields of study: psychiatry, psychoanalysis, ethnology and comparative religion amongst others. In due course it became a standard work and was translated into French, Dutch and Italian as well as English, in which language it was given the well-known but somewhat misleading title of The Psychology of the Unconscious. In the Foreword to the present revised edition which first appeared in 1956, Jung says: '...it was the explosion of all those psychic contents which could find no room, no breathing space, in the constricting atmosphere of Freudian psychology... It was an attempt, only partially successful, to create a wider setting for medical psychology and to bring the whole of the psychic phenomena within its purview.' For this edition, appearing ten years after the first, bibliographical citations and entries have been revised in the light of subsequent publications in the Collected Works and in the standard edition of Freud's works, some translations have been substituted in quotations, and other essential corrections have been made, but there have been no changes of substance in the text.
