attention to democratic practices and curricula in the school if we wanted to improve the quality of citizen participation and strengthen this democracy. School practices during that period reflected a much lower priority for social studies. Fewer social studies offerings, fewer credits required for graduation and in many cases, the job descriptions of social studies curriculum coordinators were transformed by changing their roles to general curriculum consultants. The mentality that prevailed in the nation's schools was "back to the basics" and the basics never included or even considered the importance of heightening the education of citizens. We certainly agree that citizens must be able to read, write and calculate but these abilities are not sufficient for effective citizenship in a democracy. This version of the original work appears at a time when young citizens, teachers and schools find themselves deluged by a proliferation of curriculum standards and concomitant mandatory testing. In the '90s, virtually all subject areas including United States history, geography, economic and civics developed curriculum standards, many funded by the federal government. Subsequently, the National Council for the Social Studies issued the Social Studies Curriculum Standards that received no federal support. Accountability, captured in the No Child Left Behind Act passed by Congress, has become a powerful, political imperative that has a substantial and disturbing influence on the curriculum, teaching and learning in the first decade of the 21st century.

This book examines accountability in the EU from different perspectives and considers whether EU citizens have real opportunities for holding decision-makers accountable. This book critically analyses five arguments which claim there are sufficient means for holding decision-makers to account in the Union. The main conclusion is that the current institutional set-up and practice of decision-making in the EU is one that merely creates an illusion of accountability. Using a strict framework focusing on the difference between formal mechanisms and actual opportunities for accountability, this highly coherent volume will be of interest to students and scholars of European politics, especially those interested in the democratic foundations of the European political system. Chapter 1 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license.
