Design — build is a project delivery system used in the construction industry. It is a method to deliver a project in which the design and construction services are contracted by a single entity known as the design — builder or design — build contractor. It can be subdivided into architect-led design — build and contractor-led design — build. In contrast to "design — bid — build", design — build relies on a single point of responsibility contract and is used to minimize risks for the project ...
