they need for an enriching hands-on geology experience, in and out of class. The Sixth Edition includes an expanded suite of interactive simulations, Narrative Art videos, Real-World videos, and animations built on the vibrant art from the text. New Smartwork5 online activities provide visual and interactive questions with answer-specific feedback. And the Geotours Google Earth(tm) exercises get students applying what they've learned to real-life site explorations. These easy-to-use tools combine with Marshak's signature narrative approach to the text and art program to give students the most effective means for visualizing, interacting with, and mastering geology concepts.

The Fifth Edition of this bestselling textbook features stunning art, the most up-to-date science, and a wealth of online learning tools, all developed under the critical eyes of Stephen Marshak. Heavily revised with remarkably detailed photographs, animations, and maps, the text offers rich and engaging pedagogy, an expanded chapter on energy, and coverage of recent global events, from Hurricane Sandy and the Washington Landslide to Typhoon Haiyan and the Japanese Tsunami.

The Student Lecture Art Notebook to accompany Earth: Portrait of a Planet is the perfect complement to the outstanding art program. This powerful learning tool contains all of the major diagrams from the text in full 4-color, with the ample room for taking notes.

Since 1960, there have been two major theoretical advances in the Earth sciences: the theory of plate tectonics and the advent of Earth systems science. Stephen Marshak's beautifully written and illustrated new text is the first to incorporate both of these discoveries from its inception. Earth: Portrait of a Planet covers all the topics of a traditional physical geology course, but also includes such topics as historical geology, environmental geology, the Earth's resources, the oceans and atmosphere, cosmology, and global change. What results is a fascinating, comprehensive portrait of planet Earth.

The most dynamic, hands-on introduction to physical geology.

"An audacious and concrete proposal...Half-Earth completes the 86-year-old Wilson's valedictory trilogy on the human animal and our place on the planet." —Jedediah Purdy, New Republic In his most urgent book to date, Pulitzer Prize-winning author and world-renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet. In this "visionary blueprint for saving the planet" (Stephen Greenblatt), Half-Earth argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual regions of the planet that can still be reclaimed—such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti, among others—Wilson puts aside the prevailing pessimism of our times and "speaks with a humane eloquence which calls to us all" (Oliver Sacks).

Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific.
