The "Voice of Foreign Exchange" is a series of expert advisor books reinventing the "Elliott Wave Theory" using modern data communications formula. The formulas, I discovered in 2009-2010, led a Russian telecommunications specialist to victory in the 2011 MQL4 competition. I will explain, in layman's terms, how Electronic Data Communication Networks (ECN) operate, the protocols used, and how those networks impact all Forex Trading Methods, Investment for MT4 or MT5 Trading System, Forex Technical Trading Strategies, and MQL4 or MQL5 Expert Advisors (EA) programming. I'll show you how to troubleshoot and discover your MT4/5 connections to your ForEx Investment Broker. I have read thousands of articles and books on Foreign Exchange (ForEx), and no one takes into consideration what I reveal in this book series. "What an arrogantly bold statement ...", you must be thinking? Here's my challenge; begin reading as many (FREE) articles, forum posts and books (the free samples?) as you are able before

I complete this book SERIES in the next several weeks (target publication date is February 2017). Establish, in your own mind, what's available today in all the current Expert Advisors for ForEx, then read this book and supporting programming supplements and use my Expert Advisors from my tutorials in Chapter 5 and 6 -- or build your own from the instructions I provide. This book and supporting pamphlet series demonstrates the "A-patchy ForEx" MQL programming shell and how to insert any of the eight (8) Expert Advisors provided in this series of instruction.
