~~Elsevier Announces 2013 Journal Impact Factor Highlights~~

Following the release of the Thompson Reuters Journal Citation Reports® (JCR) for 2013, Springer announced that 26 of its journals have received a first-time impact factor (IF). That brings the total number of Springer journals listed in the report – including many that are published on behalf of the company ' s society partners – to 1,570.

~~Springer announces new impact factors for its journals~~

The impact factor or journal impact factor of an academic journal is a scientometric index calculated by Clarivate that reflects the yearly average number of citations that articles published in the last two years in a given journal received. It is frequently used as a proxy for the relative importance of a journal within its field; journals with higher impact factors are often deemed to be more important than those with lower ones.
