The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts. We welcome manuscripts based on cutting-edge research from a wide variety of theoretical perspectives and methodological orientations. The editorial team is particularly interested in working with international authors, authors from traditionally marginalized populations, and in work that is relevant to practitioners around the world. Growing numbers of educators and professors look to the six bimonthly issues to: deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement.

Globalization has fueled the growth of entrepreneurship. Starting a new venture involves risk taking as well as capital investment. This book delves into all the varied aspects of entrepreneurship. The impact of economic policies, finances, opportunity and capacity are some of the topics covered in this text. It will prove beneficial to students, scholars, professionals, aspiring entrepreneurs, etc.

Corporate and Trust Structures: Legal and Illegal Dimensions is a collection of essays by experts in company law, trusts and financial crime. It explores the nature of companies and trusts, how they have been utilised for legitimate business purposes, and how they can be exploited by criminals for illegal purposes. Basic concepts relating to trusts and companies are considered, together with recent developments in corporate liability, including when liability may be attributed to companies and when the veil of limited liability may be lifted. Complex corporate structures, including the ownership structure of the Alibaba Group, are examined. The Panama Papers' revelations are also discussed together with the mechanisms within trusts and company structures that make them vulnerable and attractive for criminal abuse. The essayists address critical issues in the domestic and international contexts, including the requirements of the international standards against money laundering relevant to trusts and companies. Academics, lawyers, business people and policy-makers will find the essays topical and relevant.

This book introduces accountants and managers to an historical perspective of corporate financial reporting to employees. It presents a resource for research and practice based upon a literature that for its pre-1970 decades has been largely unfamiliar to contemporary educators, researchers and practitioners alike. In addition the pieces not only provide an historical view of issues and arguments, but of actual reporting practice and audience responses. For the students and researcher, these readings offer a first-hand glimpse into the intentions of employee report producers, the critiques of observers at the time, and the requirements of employees in some instances. For report producers, managers and accountants, it reveals some of the reporting traditions that we have inherited today as well as reporting practices that have already been recommended, tried and tested in the past. The readings selected cover a sixty year period from the 1920s through to the close of the 1970s, with the exception of the first contribution by Lewis, Parker and Sutcliffe (1984) that serves as the historical overview and analysis for the whole text.

The success of every business in the hospitality industry depends on maximizing revenues and minimizing costs. This Ninth Edition continues its time-tested presentation of fundamental concepts and analytical techniques that are essential to taking control of real-world accounting systems, evaluating current and past operations, and effectively managing finances toward increased profits. It offers hands-on coverage of computer applications and practical decision-making skills to successfully prepare readers for the increasingly complex and competitive hospitality industry.

This volume collects together out of print and hard to find sources on the behavioural implications of accounting. It begins with the 1952 monograph, The Impact of Budgets on People by Chris Argyris, considered by many to mark the beginning of behavioural research in accounting and is followed by: a critique of the general state of accounting research in 1960 critical evaluation of Argyris' research and other behavioural studies discussion of the research activity in the behavioural aspects of accounting during the 1960s and 70s a comprehensive perspective on the development of behavioural accounting research in the 1980s including discussion of the division of behavioural accounting research into two branches.
