Four Fish is a book about the future of fish by an angler journalist and writer, Paul Greenberg. How many fish do we need for our food, and how many are there in the sea? Paul Greenberg writes the future of human growth depends largely on how we manage our ocean, and a few basic guidelines should be followed to find a balance between human desire and ocean sustainability.

~~Four Fish: The Future of the Last Wild Food: Amazon.co.uk ...~~

Four Fish: The Future of the last Wild Food by Paul Greenburg examines the condition of the Earth's fisheries by focusing on four fish: salmon, sea bass, cod and tuna. Any book that addresses natural resources and humanity's treatment of them has high potential to be very depressing.

~~Four Fish: The Future of the Last Wild Food by Paul Greenberg~~

Four Fish: The Future of the Last Wild Food is a 2010 nonfiction book by author Paul Greenberg. This work explores the state of commercial fishing and aquaculture. Greenberg frames his observations by commenting on the status of four specific fish: cod, salmon, bass, and tuna.

~~Four Fish The Future Of The Last Wild Food [PDF]~~

In Four Fish, award-winning writer and lifelong fisherman Paul Greenberg takes us on a culinary journey, exploring the history of the fish that dominate our menus — salmon, sea bass, cod, and tuna — and investigating where each stands at this critical moment in time. He visits Norwegian megafarms that use genetic techniques once pioneered on sheep to grow millions of pounds of salmon a year.

~~Four Fish: The Future of the Last Wild Food: Greenberg ...~~

The four fish that are investigated are the Tuna, the Salmon, the Bass, and the Cod—the four fish that dominate the menus at fancy restaurants and fast food chains and family dinner tables. The underlying premise is that globally we are overfishing. We are harvesting more fish every year than are produced.
