Written by leading orthopaedists and rehabilitation specialists, this volume presents sequential treatment and rehabilitation plans for fractures of the upper extremity, lower extremity, and spine. The book shows how to treat each fracture--from both an orthopaedic and a rehabilitation standpoint--at each stage of healing. Each chapter on an individual fracture is organized by weekly postfracture time zones. For each time zone, the text discusses bone healing, physical examination, dangers, x-rays, weight bearing, range of motion, strength, functional activities, and gait/ambulation. Specific treatment strategies and rehabilitation protocols are then presented. More than 500 illustrations complement the text.

distinction has been made regarding what conditions are appropriately managed by primary care and emergent/urgent care providers and which need orthopaedic subspecialist care A must have resource for students, residents, primary care providers, emergent and urgent care providers and orthopaedic providers in all practice environments.

Featuring 775 full-color illustrations, this atlas demonstrates the surgical approaches used in orthopaedics and provides a surgeon's-eye view of the relevant anatomy. Each chapter details the techniques and pitfalls of a surgical approach, gives a clear preview of anatomic landmarks and incisions, and highlights potential dangers of superficial and deep dissection. The Fourth Edition describes new minimally invasive approaches to the spine, proximal humerus, humeral shaft, distal femur, proximal tibia, and distal tibia. Other highlights include new external fixation approaches for many regions and surgical approaches to the os calcis. New illustrations of the appendicular skeleton are included. New drawings show the important neurovascular structures that need to be protected.

A master surgeon and scholar have created the first true reference for the increasingly complex field of orthopaedic surgery arranged in easy-to-find, item-by-item alphabetical sequence. Every term--anatomic,
