Monograph Vol
Physics
Our goal is to develop
automated methods for
the segmentation of thr-
dimensional biomedical
images. Here, we

Download Free Handbook Of

describe the
segmentation of c- focal
microscopy images of
bee brains (20
individuals) by
registration to one or
several atlas images.

Registration is
performed by a highly
parallel imp- mentation
of an entropy-based
nonrigid registration
algorithm using B-
spline transformations.

Download Free Handbook Of

We present and evaluate different methods to solve the correspondence problem in atlas based registration. An image can be segmented by registering it to an individual atlas, an average atlas, or multiple atlases. When registering to multiple atlases, combining the individual segmentations into a ?na

Download Free Handbook Of

segmentation can be achieved by atlas selection, or multiclassifier decision fusion. We describe all these methods and evaluate their segmentation accuracies that they achieve by performing experiments with electronic phantoms as well as by comparing their outputs to a manual gold standard. The present work is focused on the
