Hot and Cold therapy are great ways of treating injuries, be it on the track, field, at home or even the office. Whenever we pick up an injury, there's always that initial impulsion to ice it down. While this might be the correct method with some injuries, it's not always the way forward, or at least there might be some steps to take before you throw on the ice or heat or vice versa.

Hot and Cold Therapy Explained - PhysioRoom Blog

Alternating Hot and Cold Therapy . After using cold therapy for 3 to 5 days for acute injuries, experts recommend to alternate hot and cold therapyfor effective pain relief from muscle tears, overuse injuries and chronic joint pain.
