The after sales segment of the automotive industry is gaining prominence over sales. The intensive competition in sales of new cars has reduced profit margins, but on the other hand, this is compensated from the higher profit margin derived from the after sales business. The onus is on the automotive manufacturers to heed to the new importance of the after sales business in reacting to the changes and expectations of customers. This book is written as a practical guide manual on matters relating to the management of the after sales business. The objective is to bring about improvements in all levels of the after sales operations in workshops. The growth, profitability and sustainability of the after sales dealerships are possible when the business is managed in an effective and efficient manner. The chapters in the book covers all matters pertaining to the after sales operations, written in an easy-to-understand manner for practical and straightforward implementation across dealerships.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory settings with performance-tuning techniques
- Build physical and virtual test benches to try out exploits safely

If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

What guy takes his granddaughter to the aquarium and spouts fish puns

all day? Who accompanies her to a children's recreation center and almost faints in the bouncy house? And which grandpa goes to the White House Easter Egg Roll so he can introduce his precious pumpkin not to the president but to Peppa Pig? Jerry Zezima, who also gives grandfatherly advice to Prince Charles, peddles his granddaughter's preschool fundraiser, introduces her to the neighborhood ice cream man, and does lots of other fun stuff, both with and without his adorable princess, which may explain why she is more mature than he is. In "Grandfather Knows Best," nationally syndicated humorist Jerry Zezima writes about the joys of grandparenthood and the things one man will do for the little girl who has captured his heart.

The fifth edition of Delmar's Automotive Service Excellence (ASE) Test Preparation Manual for the C1 SERVICE CONSULTANT certification exam contains an abundance of content designed to help you successfully pass your ASE exam. This manual will ensure that you not only understand the task list and therefore the content your actual certification exam will be based upon, but also provides descriptions of the various types of questions on a typical ASE exam, as well as presents valuable test taking strategies enabling you to be fully prepared and confident on test day.

"Words That Sell Service" is packed with knowledge and wisdom that will help you sell smarter not harder. A "must have" for service advisors and managers in automotive dealerships and repair facilities! Many simple yet exceptional techniques are demonstrated in each of the selling word tracks provided. Learn the critical skills of how to talk "with" your clients instead of "at" your clients by engaging them in a conversational sales presentation, while incorporating your unique personality. This 53 page book contains a wealth of information that will guide service advisors and managers into a more successful and lucrative career.

Recounting his three years in Korea, the highest-ranking non-Korean executive at Hyundai sheds light on a business culture very few Western journalists ever experience, in this revealing, moving, and hilarious memoir. When Frank Ahrens, a middle-aged bachelor and eighteen-year veteran at the Washington Post, fell in love with a diplomat, his life changed dramatically. Following his new bride to her first appointment in Seoul, South Korea, Frank traded the newsroom for a corporate suite, becoming director of global communications at Hyundai Motors. In a land whose population is 97 percent Korean, he was one of fewer than ten non-Koreans at a company headquarters of thousands of employees. For the next three years, Frank traveled to auto shows and press conferences around the world, pitching Hyundai to former colleagues while trying to navigate cultural differences at home and at work. While his appreciation for absurdity enabled him to laugh his way through many awkward

encounters, his job began to take a toll on his marriage and family. Eventually he became a vice president—the highest-ranking non-Korean at Hyundai headquarters. Filled with unique insights and told in his engaging, humorous voice, *Seoul Man* sheds light on a culture few Westerners know, and is a delightfully funny and heartwarming adventure for anyone who has ever felt like a fish out of water—all of us.

In this completely revised and updated edition of the customer service classic, Carl Sewell enhances his time-tested advice with fresh ideas and new examples and explains how the groundbreaking “Ten Commandments of Customer Service” apply to today’s world. Drawing on his incredible success in transforming his Dallas Cadillac dealership into the second largest in America, Carl Sewell revealed the secret of getting customers to return again and again in the original *Customers for Life*. A lively, down-to-earth narrative, it set the standard for customer service excellence and became a perennial bestseller. Building on that solid foundation, this expanded edition features five completely new chapters, as well as significant additions to the original material, based on the lessons Sewell has learned over the last ten years. Sewell focuses on the expectations and demands of contemporary consumers and employees, showing that businesses can remain committed to quality service in the fast-paced new millennium by sticking to his time-proven approach: Figure out what customers want and make sure they get it. His “Ten Commandants” provide the essential guidelines, including:

- Underpromise, overdeliver: Never disappoint your customers by charging them more than they planned. Always beat your estimate or throw in an extra service free of charge.
- No complaints? Something’s wrong: If you never ask your customers what else they want, how are you going to give it to them?
- Measure everything: Telling your employees to do their best won’t work if you don’t know how they can improve.

BLACK ENTERPRISE is the ultimate source for wealth creation for African American professionals, entrepreneurs and corporate executives. Every month, BLACK ENTERPRISE delivers timely, useful information on careers, small business and personal finance.
