Italians love to talk about food. The aroma of a simmering ragú, the bouquet of a local wine, the remembrance of a past meal: Italians discuss these details as naturally as we talk about politics or sports, and often with the same flared

tempers. In *Why Italians Love to Talk About Food*, Elena Kostioukovitch explores the phenomenon that first struck her as a newcomer to Italy: the Italian "culinary code," or way of talking about food. Along the way, she captures the fierce local pride that gives Italian cuisine its remarkable diversity. To come to know Italian food is to discover the differences of taste, language, and attitude that separate a Sicilian from a Piedmontese or a Venetian from a Sardinian. Try tasting Piedmontese bagna cauda, then a Lombard cassoela, then lamb ala Romana: each is part of a unique culinary tradition. In this learned, charming, and entertaining narrative, Kostioukovitch takes us on a journey through one of the world's richest and most adored food cultures. Organized according to region and colorfully designed with illustrations,

maps, menus, and glossaries, Why Italians Love to Talk About Food will allow any reader to become as versed in the ways of Italian cooking as the most seasoned of chefs. Food lovers, history buffs, and gourmards alike will savor this exceptional celebration of Italy's culinary gifts.

Illustrated throughout with original drawings by Luciana Marini, this will be the standard reference on one of the world's favorite foods for many years to come, engaging and delighting both general readers and food professionals.

This has led to the establishment of such organizations as Slow Food, dedicated to preserving all aspects of culinary tradition, including the sacrosanct activity of consuming a meal at an Italian table. THE MYTHS SURROUNDING THE WORLD'S FAVOURITE DISH, DEBUNKED Did Marco Polo bring pasta back from China, or is that a myth? How did the Neapolitan “macharoni” turn into the ubiquitous spaghetti? Is it even an Italian dish? Hundreds of shapes and thousands of recipes give expression to the culture and products of the country's regions. But spaghetti with tomato sauce remains Italy's identity dish par excellence. Massimo Montanari goes in search of the dish's true origins, tracing its history along the

multiple, intricate routes taken by its raw ingredients to merge and become a distinctive element of culinary tradition. It took almost two thousand years and input from the Far East, the Arabic world, and the Americas, for the dish to take centre stage. Its development is the result of chance encounters, unplanned exchanges, and unpredictable intersections. As we dig in search of spaghetti's origins, we find its strands wrap right around the world. The lives of millions of fellow Americans.

A chronicle of the beloved base ingredient, from its origins, agricultural riches, and controversy to the passion, pride, and

nostalgia it inspires today. Over time, the tomato has embodied a range of values and meanings. From its domestication in Central America, it has traveled back and forth across the Atlantic, powering a story of aspiration and growth, agriculture and industry, class and identity, and global transition. In this entertaining, organic history, David Gentilcore recounts the surprising rise of the tomato from its New World origin to its Old World significance. From its inauspicious introduction into Renaissance Europe, the tomato came to dominate Italian cuisine and the food industry over the course of three centuries. Gentilcore explores why elite and peasant cultures took so long to assimilate the tomato into Italian cooking and how it eventually triumphed. He traces the tomato's appearance in medical and

agricultural treatises, travel narratives, family recipe books, kitchen accounts, and Italian art, literature, and film. He focuses on Italy's fascination with the tomato, painting a larger portrait of changing trends and habits that began with botanical practices in the sixteenth century and attitudes toward vegetables in the seventeenth and eighteenth centuries, and concluded with the emergence of factory production in the nineteenth. Gentilcore continues with the transformation of the tomato into a national symbol during the years of Italian immigration and Fascism and examines the planetary success of the "Italian" tomato today. "Those with an interest in tomatoes, Italian life, or just cultural history in general may find this both enlightening and entertaining."

The famous clash between Edmund Burke and Tom Paine over the Enlightenment's "evil" or "liberating" potential in the French Revolution finds present-day parallels in the battle between those who see the Enlightenment at the origins of modernity's many ills, such as imperialism, racism, misogyny, and totalitarianism, and those who see it as having forged an age of democracy, human rights, and freedom. The essays collected by Charles Walton in *Into Print* paint a more complicated picture. By focusing on print culture—the production, circulation, and reception of Enlightenment thought—they show how the Enlightenment was shaped through practice and reshaped over time. These essays expand upon an approach to the study of the

Enlightenment pioneered four decades ago: the social history of ideas. The contributors to *Into Print* examine how writers, printers, booksellers, regulators, police, readers, rumormongers, policy makers, diplomats, and sovereigns all struggled over that broad range of ideas and values that we now associate with the Enlightenment. They reveal the financial and fiscal stakes of the Enlightenment print industry and, in turn, how Enlightenment ideas shaped that industry during an age of expanding readership. They probe the limits of Enlightenment universalism, showing how demands for religious tolerance clashed with the demands of science and nationalism. They examine the transnational flow of Enlightenment ideas and opinions, exploring its domestic and diplomatic implications. Finally, they show how the culture of

the Enlightenment figured in the outbreak and course of the French Revolution. Aside from the editor, the contributors are David A. Bell, Roger Chartier, Tabetha Ewing, Jeffrey Freedman, Carla Hesse, Thomas M. Lockett, Sarah Maza, Renato Pasta, Thierry Rigogne, Leonard N. Rosenband, Shanti Singham, and Will Slauter.
