but such width shall not be less than 44 inches (1118mm). see section 1007.3 for accessible means of egress stairways.

## *IBC Stairs Code*

When it comes to commercial stair standards, the International Building Code (IBC) establishes the minimum

# Acces PDF International Building Code Stair Treads And Risers

requirements for stairs to insure a level of safety to the public. Several components are looked at such as stair width, headroom, riser and tread heights.

*Commercial Stair Codes: EXPLAINED -  
Building Code Trainer*

Sum of treads and risers. The sum of two

# Acces PDF International Building Code Stair Treads

risers plus one tread exclusive of nosing shall be not less than 24 inches (610 mm) nor more than 25 1 / 2 inches (648 mm).

Dimensions of treads and risers. The maximum riser height shall be 8 1 / 4 inches (210 mm) and the minimum tread depth shall be 9 inches (229 mm) plus nosing.

# Acces PDF International Building Code Stair Treads And Risers

*Stair Treads and Risers / UpCodes*

Staircase risers should be adequately deep to allow a majority of your foot to have enough room to rest on the stair. Stair tread depth is more of an issue for descending, rather than ascending, stairs. Further, the tread measurement of every

# Acces PDF International Building Code Stair Treads

tread in a stairway should be as close as possible to identical. The greatest tread depth within a flight of stairs cannot be more than 3/8 inch larger than the smallest tread depth.
