Bringing together leading researchers, this book comprehensively covers what is known about the amygdala, with a unique focus on what happens when this key brain region is damaged or missing. Offering a truly comparative approach, the volume presents research on rats, monkeys, and humans. It reports on compelling cases of people living without an amygdala, whether due to genetic conditions, disease, or other causes. The consequences for an individual's ability to detect danger and regulate emotions--and for broader cognitive and social functions--are explored, as are lessons learned about brain pathways and plasticity. The volume delves into the role of the amygdala in psychiatric disorders and identifies important directions for future research. Illustrations include six color plates.

With this book and one afternoon, chances are you can cut your work week down to 15 hours or less. The simple process requires nothing more than a little motivation, a willingness to embrace change, and about a month of preparation. No waiting, no fancy tricks, just effective, simple solutions. Here, Jesse Shelton explains how work in its conventional 9-5 form is not necessary, and, through concise and pragmatic advice, maps a way out of it. Tired of sifting through dozens of verbose and partially-effective books promising to save money, eliminate the need for work, and save the environment, Shelton decided to write his own; a book that would concisely explain the most effective ways to reduce or eliminate the need for money-making work while simultaneously reducing our overall negative environmental impact. The result is this book, based on his life and experiences living without a 'regular' job. He starts with four simple premises: 1) The majority of the labor humans engage in is not necessary. 2) This additional labor has been unconsciously created as a result of our impractical lifestyles. 3) The extent of this impracticality directly correlates to the distance to which our lifestyles are removed from natural processes. 4) We can close the distance between our lifestyles and natural processes through simple changes. Using these premises as a foundation, Shelton explains over 340 specific ways to eliminate work, and to start enjoying life. He covers subjects such as energy and water, food and drink, health and cleaning, transportation, work-eliminating housing retrofits, financial decisions and investments, travel,

and how to set up automated incomes. After all this, what we are left with is more free time, less stress, and an environmentally-friendly life that's still as comfortable as everyone else's. The primary benefit being that, without work, we can take all those hours we normally spend trying to build a good life, and use them to actually live it.

A guide to making money sans job offers insight-provoking interactive tests, self-evaluations, charts, and checklists, as well as numerous anecdotes about people who are successfully self-employed. "If you are ready to stretch your mind to the idea of making a living without a job, you'll find plenty of encouragement and practical information here. Designing a lifestyle for yourself that nurtures and supports who you are and what you value won't happen instantaneously, but this book will certainly make the process simpler and easier for you. Becoming joyfully jobless begins with a commitment to self-discovery, a curiosity about your potential, and a willingness to acquire the information and skills that will enhance your work. Your way will be unlike anyone else's, although you will share a deep camaraderie with others on this path. Being your own boss is both heady and humbling, but it's seldom boring." —Barbara J. Winter, from the Introduction

*Living Without the Screen* provides an in-depth study of those American families and individuals who opt not to watch television, exploring the reasons behind their choices, discussing their beliefs about television, and examining the current role of television in the American family. Author Marina Krucmar answers several questions in the volume: What is television? Who are those people who reject it? What are their reasons for doing so? How do they believe their lives are different because of this choice? What impact does this choice have on media research? This volume provides a current, distinctive, and important look at how personal choices on media use are made, and how these choices reflect more broadly on media's place in today's society. A compelling exploration of the motivations and rationales for those who choose to live without television, this book is a must-read for scholars and researchers working in children and media, media literacy, sociology, family studies and related areas. It will also be of interest to anyone with questions about media usage and the choices families make regarding the role of media in their lives.
