The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

After losing her family in a rogue attack, Raina is left to put her life back together. Finding a new pack with her wolf, Lela, she is hoping to finally settle down and find her mate. Raina did not understand the significance of her red wolf, Lela, until she discovers just how significant a red wolf is to the entire werewolf community. Faced with new abilities as a red wolf, Raina must navigate how to manage her abilities while also facing ongoing threats of rogues who are trying to kidnap her. When Raina finds her mate, will she be able to finally escape the rogue threat and gain control of her abilities? This is Book One of the Red Wolf's Guardian Series.

The Maths Mate Yellow Student Pad is part of the popular Maths Mate Program, which was originally published in 1995. The program's success over more than two decades is due to its unique design, allowing the review and gradual development of basic skills.
