[Preventive Services & Screenings](#)

The FQHC services consist of services that are similar to those provided in rural health clinics (RHC) but also include preventive primary services, as described in Pub. 100-02, Medicare Benefit Policy Manual, chapter 13. An RHC cannot be concurrently approved for Medicare as both an FQHC and an RHC.

The 2001 CPT Professional comes with all 2001 code information. This code book also includes colour keys, anatomical illustrations, medical terminology, thumb tabs and a convenient spiral binding.

This guide to successful practices in observation medicine covers both clinical and administrative aspects for a multinational audience.

For more than a generation haemodialysis has been the principal method of treating patients with both acute and chronic renal failure. Initially, developments and improvements in the system were highly technical and relevant to only a relatively small number of specialists in nephrology. More recently, as advances in therapy have demonstrated the value of haemofiltration in the intensive therapy unit and haemoperfusion for certain types of poisoning, the basic principles of haemodialysis have been perceived as important in many areas of clinical practice. In this volume, the potential advantages of bicarbonate haemo dialysis are objectively assessed, the technical and clinical aspects of both haemofiltration and haemoperfusion discussed and the continuing problems associated with such extra corporeal circuits analysed. All the chapters have been written by recognized experts in their field. The increasing availability of highly technical facilities for appropriately selected patients should ensure that the information contained in the book is relevant not only to nephrologists but to all practising clinicians. ABOUT THE EDITOR Dr Graeme R. D. Catto is Professor in Medicine and Therapeutics at the University of Aberdeen and Honorary Consultant Physician/Nephrologist to the Grampian Health Board. His current interest in transplant immunology was stimulated as a Harkness Fellow at Harvard Medical School and the Peter Bent Brighton Hospital, Boston, USA. He is a member of many medical societies including the Association of Physicians of Great Britain and Ireland, the Renal Association and the Transplantation Society.

Hospital billing departments are known by various names, but their staff all experience the same problems understanding and complying with Medicare's many billing requirements. Hospital Billing From A to Z is a comprehensive, user-friendly guide to hospital billing requirements, with particular emphasis on Medicare. This valuable resource will help hospital billers understand how compliance, external audits, and cost-cutting initiatives affect the billing process. Beginning with 2-Midnight Rule and Inpatient Admission Criteria and ending with Zone Program Integrity Contractors, this book addresses 88 topics in alphabetical order, including the following: Correct Coding Initiative CPT, HCPCS, Condition Codes, Occurrence Codes, Occurrence Span Codes, Revenue Codes, and Value Codes Critical Access Hospitals Deductibles, Copayments, and Coinsurance Denials, Appeals, and Reconsideration Requirements Dialysis and DME Billing in Hospitals Hospital-Issued Notice of Noncoverage Laboratory Billing and Fee Schedule Local and National Coverage Determinations Medically Unlikely Edits and Outpatient Code Editor Medicare Advantage Plans Medicare Beneficiary Numbers and National Provider Identifier Medicare Part A and Part B No-Pay Claims Observation Services Outlier Payments Present on Admission Rejected and Returned Claims UB-04 Form Definitions

This is the most comprehensive CPT coding resource published by the American Medical Association. This new Professional Edition provides all the features of the Standard Edition plus many extras. It contains: 100 anatomical and procedural illustrations; an overview of modifiers and abbreviations; Color-coded keys for easy identification of section headings; New procedural drawings for visual confirmation of procedures being coded.

The annual CPT Standard Edition provides convenient access to a listing of descriptive terms and identifying codes for reporting medical services and procedures performed by physicians and other health care providers. CPT codes provide an effective means for reliable nationwide communication among physicians, patients and third party payers.

Patient-centered, high-quality health care relies on the well-being, health, and safety of health care clinicians. However, alarmingly high rates of clinician burnout in the United States are detrimental to the quality of care being provided, harmful to individuals in the workforce, and costly. It is important to take a systemic approach to address burnout that focuses on the structure, organization, and culture of health care. Taking Action Against Clinician Burnout: A Systems Approach to Professional Well-Being builds upon two groundbreaking reports from the past twenty years, To Err is Human: Building a Safer Health System and Crossing the Quality Chasm: A New Health System for the 21st Century, which both called attention to the issues around patient safety and quality of care. This report explores the extent, consequences, and contributing factors of clinician burnout and provides a framework for a systems approach to clinician burnout and professional well-being, a research agenda to advance clinician well-being, and recommendations for the field.

Regional health care databases are being established around the country with the goal of providing timely and useful information to policymakers, physicians, and patients. But their emergence is raising important and sometimes controversial questions about the collection, quality, and appropriate use of health care data. Based on experience with databases now in operation and in development, Health Data in the Information Age provides a clear set of guidelines and principles for exploiting the potential benefits of aggregated health data—without jeopardizing confidentiality. A panel of experts identifies characteristics of emerging health database organizations (HDOs). The committee explores how HDOs can maintain the quality of their data, what policies and practices they should adopt, how they can prepare for linkages with computer-based patient records, and how diverse groups from researchers to health care administrators might use aggregated data. Health Data in the Information Age offers frank analysis and guidelines that will be invaluable to anyone interested in the operation of health care databases.
