Mike Hagen opens up a whole new world to those photographers who are already well versed in photography, but may not have a clue about flash photography. With the new and rapidly evolving technology, flash photography (especially advanced light modeling with modern iTTL flash systems) has become an art in itself and should be mastered by all aspiring photographers-amateurs as well as professionals-who are often helpless when it comes to using the full potential of these systems. Using a simple, step-by-step method for setting up and using the newest Nikon iTTL flash units, Mike teaches all the steps required to achieve consistent and amazing flash photos.

Debunking the common misconception that a flash is only necessary in low-light situations, this DVD guide provides professional instruction on how to properly direct and shape light in order to marshal mood, shape, texture, and color to make photographs more dynamic and visually interesting. Beginning with an introduction to the basic characteristics of light—the quality and diffusion of light, the direction of the light, and the color of the light—it goes on to discuss aperture, shutter speed, and ISO and their relation to Nikon flash systems. After teaching how to master these

fundamentals, the DVD discusses how to use Nikon flashes, how to modify the light from flashes, and what subject matter looks good in different lighting situations.

The most important aspect of capturing a quality image isn't the camera you use, the aperture settings, the shutter speed, or the ISO—it's the light. With this ebook, you will learn how to enhance the light in your images by using the Nikon Creative Lighting System (CLS), which allows you to easily take great photos with natural-looking light using a flash either on or off camera. You'll learn how to wirelessly control the amount of light of the remote flashes right from the camera, control an unlimited number of flashes, and use the flashes in up to three different controllable groups. If you have a relatively recent model of a higher-end consumer Nikon camera and a Speedlight, chances are you are ready to go! Follow along with Alan and you will: Learn your way around all the components of the CLS system, including cameras, flashes, and flash accessories Develop an understanding of flash photography and learn the basics of getting the best results using Basic Flash, Fill Flash, and Sync Modes Master the mechanics of setting up multiple flashes to build up the light in an image Explore advanced flash setups, learning to control an unlimited number of remote flashes, and work with more complex lighting setups
