False positive and false negative results of the nitrazine test are up to 17.4% and 12.9%, respectively with sensitivity of 90.7% and specificity of Page 11/25

**Nitrazine Paper Test Results—infocaretraining.com.br** There is a 5 percent rate of false positive results using nitrazine tests, and 1 percent rate of false negative results. Nitrazine tests are administered by placing a few drops of collected vaginal fluid onto a strip of paper that has been treated with nitrazine dye. The color of the paper strip changes depending on the pH of the sample. The color is then matched on a chart that determines the corresponding pH of the sample. Results of the test can be read immediately.

Clinical Pathology Board Review covers all of the major subject areas of clinical pathology, presenting you with an essential study guide for certification or recertification. Designed as a companion to Anatomic Pathology Board Review, 2nd Edition, this brand-new medical reference book will be a welcome resource for pathology residents and practicing pathologists alike. Understand all of the major subject areas of clinical pathology tested on the Clinical Pathology board exam, including chemistry, hematology, coagulation, microbiology, immunology (including HLA testing), transfusion medicine (including therapeutic apheresis), cytogenetics, and molecular diagnostics. Prepare for the boards with help from multiple-choice questions offered in a format that mimics that of the actual test. Effectively grasp key concepts with questions that integrate various areas of clinical pathology, as well as questions that bridge concepts in clinical pathology with those in anatomic pathology. Understand why an answer is correct or incorrect with help from brief explanations accompanying each. Review key concepts in laboratory medicine, correlate them to the associated clinical or laboratory information, and apply them to the diagnosis and management of human disease. Designed as a companion to Anatomic Pathology Board Review, 2nd Edition (ISBN: 9781465711406).

Introducing Diseases, Complications, and Drug Therapy in Obstetrics— A Guide for Clinicians. Edited by Gerald Briggs and Michael Nagette, two of the leading names in maternal-fetal medicine. This new resource both answers your questions and provides practical tools for your daily patient care. This book is comprised of 27 chapters and broken down in three key sections: I. General Considerations in Pregnancy and Lactation II. Complications Unique to Pregnancy III. Treatment of Chronic Diseases in Pregnancy In sections II and III, case discussions bookend the chapters and there are extensive figures, tables, and discussion questions throughout. This text is designed to help you navigate the best course of treatment for your patients. Learn how to safely treat expectant mothers who suffer from chronic diseases, such as: Asthma Depression Gestational diabetes Epilepsy Chronic hypertension Infectious disease Nausea Autoimmune disease Thromboembolic disease Thyroid disease The two expert editors and thirty-two contributors cover many of the questions your patients may ask, including - Which over-the-counter medicines are safe? - What physiologic changes are normal during pregnancy? - Will this cause my baby any developmental delays? - Is this medication safe during lactation? If you work with pregnant women and lactating mothers, you need to understand the risks and rewards of drug therapy. Your well-informed choices can save lives.

The second edition of this textbook is an essential revision aid for trainees preparing for Membership of the Royal College of Obstetricians and Gynaecologists (MRCOG) examinations. Comprising nearly 1000 pages, the text has been fully updated and is in-line with the current syllabus and guidelines as recommended by The National Institute for Clinical Excellence (NICE) and the Royal College of Obstetricians and Gynaecologists (RCOG). The book is divided into three main sections – General, Obstetrics, Gynaecology. The first section, General, provides an overview of the principles of clinical practice and surgery. The Obstetrics and Gynaecology sections are further subdivided, with Obstetrics covering the antenatal period, disorders during pregnancy, complications in different stages of pregnancy, intra- and post-partum, delivery, and the newborn; and Gynaecology covering general gynaecology, menstruation abnormalities, reproductive medicine, urogynaecological and pelvic abnormalities, gynaecological oncology, lower genital tract problems, and contraception. Numerous clinical photographs, flowcharts, tables and boxes, further enhance the invaluable text. Key points Second edition of practical revision aid for trainees preparing for MRCOG examinations Text in-line with current syllabus and guidelines recommended by NICE and RCOG Highly illustrated with clinical photographs, flowcharts, tables and boxes Previous edition (9789386322876) published in 2017

An all-inclusive guide to fundamentals and medical-surgical nursing for the LPN/LVN, Foundations and Adult Health Nursing, 7th Edition covers the skills you need for clinical practice, from anatomy and physiology to nursing interventions and maternity, neonatal, pediatric, geriatric, mental health, and community health care. Guidelines for patient care are presented within the framework of the five-step nursing process: Nursing Care Plans are described within a case-study format to help you develop skills in clinical decision-making. Written by Kim Cooper and Kelly Gosnell, this text includes all of the content from their Foundations of Nursing and Adult Health Nursing books, including review questions to help you prepare for the NCLEX-PN® examination! Full-color, step-by-step instructions for over 100 skills show nursing techniques and procedures along with rationales for each. The 5-step Nursing Process connects specific disorders to patient care – with a summary at the end of each chapter. Nursing Care Plans emphasize patient goals and outcomes within a case-study format, and promotes clinical decision-making with critical thinking questions at the end of each care plan. Clear coverage of essential A&P is provided by an Introduction to Anatomy and Physiology chapter along with an overview of A&P in all body systems chapters. Student-friendly features enhance the learning of nursing skills with summary boxes for Patient Teaching, Health Promotion Considerations, Complementary and Alternative Therapy, Cultural Considerations, Older Adult Considerations, Home Care Considerations, Safety Alert, and Prioritization, Assignment, and Supervision. UNIQUE! Mathematics review in Dosage Calculation and Medication Administration chapter covers basic arithmetic skills prior to the discussion of medication administration. A focus on preparing for the NCLEX examination includes review questions and Get Ready for the NCLEX Examination! sections with key points organized by NCLEX Client Needs Categories. Evidence-Based Practice boxes provide synopses of nursing research articles and other scientific articles applicable to nursing, along with nursing implications for the LPN/LVN. Nursing Diagnosis boxes summarize nursing diagnoses for specific disorders along with the appropriate nursing interventions. UNIQUE! Delegation Considerations boxes provide parameters for delegation to nurse assistants, patient care technicians, and unlicensed assistive personnel. Medication Therapy tables provide quick access to actions, dosages, precautions, and nursing considerations for commonly used drugs. NEW! Reorganized chapters make it easier to follow and understand the material. NEW! Icons in page margins indicate videos, audios, and animations on the Evolve companion website that may be accessed for enhanced learning. UPDATED illustrations include photographs of common nursing skills.

An excellent resource for appropriate test ordering and interpretation, Wallach 's Interpretation of Diagnostic Tests, 11th Edition, helps you save time, avoid errors, and arrive at an accurate diagnosis. Organized into two easy-to-reference sections, this fully revised manual provides comprehensive, practical information on common and uncommon disease states and their diagnosis by laboratory test. The eleventh edition has been revised and reorganized based on reader feedback, helping primary care physicians, subspecialists, physician assistants, nurse practitioners, and medical and nursing students keep pace with a rapidly changing health care environment.

It is my hope, that this information can lead you on a path of wellness - we are made of what we eat, think and feel - and, we should eat to increase our strength, preserve our health, and nourish our life. We should think more positively, attentively, and aware of the consequences of negative thoughts contributing to dis-esse, pain, suffering and trauma. And, finally we should learn to FEEL all our emotions - negative and positive - to achieve growth and the potential for an intuitive, connected, and well-deserved future towards the goal of synchronizing our Body, Mind and Spirits. I have all the faith, in the world, that with this knowledge or body of evidence, the reader can completely and convincingly come to the conclusion, beyond a reasonable doubt - that it is our responsibility to feed, clothe and shelter ourselves against F.E.A.R. and society 's beliefs regarding how we should or should not do this. It is "my" truth within these pages, based on my personal and professional experience - it is up to you, whether you digest it (totally or partially), assimilate the information to your personal beliefs, thoughts and ideals, and/or eliminate the information from your data base altogether. The choice is always yours... and always will be... Forever I CONTACT: authork@gmail.com OR checkout this blog http://organicaalhealing.blogspot.com

Featuring the most accurate, current, and clinically relevant information available, Maternal Child Nursing Care in Canada, 2nd Edition, combines essential maternity and pediatric nursing information in one text. The promotion of wellness and the care for women experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health problems including physiological dysfunctions and children with special needs and illnesses are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Nursing Alerts point students to critical information that must be considered in providing care. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop analytical skills and apply knowledge in various settings. Emergency boxes guide you through step-by-step emergency procedures. Family-Centred Teaching boxes highlight the needs or concerns of families that you should consider to provide family-centred care. NEW! Content updates throughout the text give you the latest information on topics such as perinatal standards, mental health issues during pregnancy, developmental and neurological issues in pediatrics, new guidelines including SOGC, and CAPWHN. NEW! Increased coverage on health care in the LGBTQ community and First Nations, Metis, and Inuit population NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.
