Phenomenological Research Methods

To understand this difference first of all , phenomenology should be differentiated from natural sciences' research methods. The first difference is , natural sciences study the world of nature , the physical nature that follows its own laws commonly known as the laws of nature. Physical nature exists in time and space and it follows the laws ...

stressful. Coyne (1994) and Somerfield (1996) argue stress research needs to focus more on qualitative methods, such as phenomenology, to provide in-depth understanding of the stress process.

Phenomenology views subjective lived experience as central to understanding and this focus on subjectivity in relation to stress is important.

An interpretative phenomenological analysis of stress and ...
