highlights the long-term challenges facing the economy. Volume II is a descriptive review of the major sectors of the economy. It emphasizes economic reforms of contemporary relevance like GST, the investment-saving slowdown, fiscal federalism and accountability, gender inequality, climate change and agriculture, science and technology, among others.

Information and communication technology (ICT) has always mattered in agriculture. Ever since people have grown crops, raised livestock, and caught fish, they have sought information from one another. Today, ICT represents a tremendous opportunity for rural populations to improve productivity, to enhance food and nutrition security, to access markets, and to find employment opportunities in a revitalized sector. ICT has unleashed incredible potential to improve agriculture, and it has found a foothold even in poor smallholder farms. ICT in Agriculture, Updated Edition is the revised version of the popular ICT in Agriculture e-Sourcebook, first launched in 2011 and designed to support practitioners, decision makers, and development partners who work at the intersection of ICT and agriculture. Our hope is that this updated Sourcebook will be a practical guide to understanding current trends, implementing appropriate interventions, and evaluating the impact of ICT interventions in agricultural programs.

Summarizing the emerging field of N-heterocyclic carbenes used in organocatalysis, this is an excellent overview of the synthesis and applications of NHCs focusing on carbon-carbon and carbon-heteroatom bond formation. Alongside comprehensive coverage of the synthesis, characteristics and applications, this handbook and ready reference also includes chapters on NHCs for polymerization reactions and natural product synthesis.

Focusing on politics and society in India, this book explores new areas enmeshed in the complex social, economic and political processes in the country. Linking the structural characteristics with the broader sociological context, the book emphasizes the strong influence of sociological issues on politics, such as social milieu shaping and the articulation of the political in day-to-day events. Political events are connected with the ever-changing social, economic and political processes in order to provide an analytical framework to explain 'peculiarities' of Indian politics. Bidyut Chakrabarty argues that three major ideological influences of colonialism, nationalism and democracy have provided the foundational values of Indian politics. Structured thematically and chronologically, this work is a useful resource for students of political science, sociology and South Asian studies.

In this book, Das deploys class theory to decipher India's economic and political situation. It deals with the specificities of India's capitalism and neoliberalism, and their economic consequences. It critically examines lower-class struggles led by the Left, and the fascistic politics of the Right.

This book examines key issues concerning land acquisition, and puts forward policy suggestions. Land acquisition is one of the most important issues besetting India's political economy today. There have been many conflicts surrounding acquisitions; but there have been ample peaceful acquisitions, too. Growth in any economy requires more land. Hence in India too, in the future more and more land will be required for the purposes of infrastructure expansion, industrialization, urbanization etc. The book also examines a number of broader policy issues in the context of land reforms and shows how a successful resolution of the land acquisition matter is vital to attaining a high rate of growth. Using a case study

method, the book examines the process of land acquisition in detail and its implications for farmers. It finds that the development of acquired land leads to higher growth and higher employment; and it also leads to improvements for the dalits (the backward class people). Benefits in terms of higher revenues for the government are also observed. It argues that, if the acquisition process is properly executed, those farmers who lose land will not oppose acquisition but will instead become partners in the process of growth.

Moseley explains the mechanisms for planning, managing and financing rural development at the local level. The text provides students and practitioners with a primer that links the theory to the practice of 'doing' rural development.
