Head of the Student Non-Violent Coordinating Committee. Honorary prime minister of the Black Panther Party. Bestselling author. Stokely Carmichael (Kwame Ture) is an American legend, one whose work as a civil rights leader fundamentally altered the course of history -- and our understanding of Pan-Africanism today. *Ready for Revolution* recounts the extraordinary course of Carmichael's life, from his Trinidadian youth to his consciousness-raising years in Harlem to his rise as the patriarch of the Black Power movement. In his own words, Carmichael tells the story of his fight for social justice with candor, wit, and passion -- and a cast of luminaries that includes James Baldwin, Toni Morrison, Bayard Rustin, Martin Luther King, Jr., Rosa Parks, Malcolm X, Ho Chi Minh, and Fidel Castro, among others. Carmichael's personal testimony captures the pulse of the cultural upheavals that characterize the modern world. This landmark, posthumously published autobiography reintroduces us to a man whose love of freedom fueled his fight for revolution to the end.

Seeing the writing on the wall, one of Spain's largest unions began secretly arming workers throughout the country. The anarcho-syndicalist union evolved from overseeing workers' defense to organizing armed resistance to the Fascist coup. From there, it administered entire militias and finally coordinated industrial self-management and food distribution, leading a revolution within the Spanish Civil War. A fascinating new history and a lively narrative of ordinary men and women making history. Agustín Guillamón is an independent historian and the author of *The Friends of Durruti Group, 1937-39* and *The Committees Revolution*.

A portrait of the supportive wife of President John Adams details the life of this extraordinary woman who used her love for learning, for her family, and for her country to shape the early history of the United States.

Stokely Carmichael, the charismatic and controversial black activist, stepped onto the pages of history when he called for "Black Power" during a speech one Mississippi night in 1966. A firebrand who straddled both the American civil rights and Black Power movements, Carmichael would stand for the rest of his life at the center of the storm he had unleashed that night. In *Stokely*, preeminent civil rights scholar Peniel E. Joseph presents a groundbreaking biography of Carmichael, using his life as a prism through which to view the transformative African American freedom struggles of the twentieth century. During the heroic early years of the civil rights movement, Carmichael and other civil rights activists advocated nonviolent measures, leading sit-ins, demonstrations, and voter registration efforts in the South that culminated with the passage of the Voting Rights Act in 1965. Still, Carmichael chafed at the slow progress of the civil rights movement and responded with Black Power, a movement that urged blacks

to turn the rhetoric of freedom into a reality through whatever means necessary. Marked by the assassinations of Malcolm X and Martin Luther King, Jr., a wave of urban race riots, and the rise of the anti-war movement, the late 1960s heralded a dramatic shift in the tone of civil rights. Carmichael became the revolutionary icon for this new racial and political landscape, helping to organize the original Black Panther Party in Alabama and joining the iconic Black Panther Party for Self Defense that would galvanize frustrated African Americans and ignite a backlash among white Americans and the mainstream media. Yet at the age of twenty-seven, Carmichael made the abrupt decision to leave the United States, embracing a pan-African ideology and adopting the name of Kwame Ture, a move that baffled his supporters and made him something of an enigma until his death in 1998. A nuanced and authoritative portrait, *Stokely* captures the life of the man whose uncompromising vision defined political radicalism and provoked a national reckoning on race and democracy.

In the speeches and articles collected in this book, the black activist, organizer, and freedom fighter Stokely Carmichael traces the dramatic changes in his own consciousness and that of black Americans that took place during the evolving movements of Civil Rights, Black Power, and Pan-Africanism. Unique in his belief that the destiny of African Americans could not be separated from that of oppressed people the world over, Carmichael's Black Power principles insisted that blacks resist white brainwashing and redefine themselves. He was concerned not only with racism and exploitation, but with cultural integrity and the colonization of Africans in America. In these essays on racism, Black Power, the pitfalls of conventional liberalism, and solidarity with the oppressed masses and freedom fighters of all races and

creeds, Carmichael addresses questions that still confront the black world and points to a need for an ideology of black and African liberation, unification, and transformation.

We are in the midst of a medical revolution: in just a few years, we will be able to have our complete DNA sequenced at an affordable cost. Analysing the content of our genomes will allow a powerful estimate of our future risks of illness - from cystic fibrosis and Huntington's disease, to cancer and diabetes - which will help us devise our own personalised blueprint of preventive medicine. This will have enormous implications on everything from our day-to-day choices like diet and exercise, to childbearing and health insurance - and it may even challenge what we thought we knew about our ethnic histories. Combining cutting-edge scientific research with practical advice, Francis Collins examines this remarkable phenomenon, which will transform healthcare worldwide. We now know that the language spoken by our DNA is the language of life itself, and in this important book Collins shows how reading that language will help save lives.

" ... Michael Neill shares an extraordinary new understanding of how life works that turns traditional psychology on its head. You'll be able to live with less stress, greater ease, and a sense of connection to the larger unfolding of life"--Publisher description.
