Research In Social

The remaining four parts focus on different types of research design.

Experimental, longitudinal, cross-sectional and case-study methods are clearly and systematically examined, and their strengths and weaknesses are described.

The result is a one-stop critical guide to design in social research that

down the types of research design into five categories: 1. Descriptive research design: In a descriptive design, a researcher is solely interested in describing the situation or case under their research study. It is a theory-based design method which is created by gathering, analyzing, and presenting collected data.
