Structural Risk Management and Asset/Liability Management for a Bank

Asset and liability management is the practice of managing financial risks that arise due to mismatches between the assets and liabilities as part of an investment strategy in financial accounting. ALM sits between risk management and strategic planning. It is focused on a long-term perspective rather than mitigating immediate risks and is a process of maximising assets to meet complex liabilities that may increase profitability. ALM includes the allocation and management of assets, equity, inte

Structural Risk Management (Asset Liability Management ...

The financial crisis stressed the importance of liquidity and financial rate risk management, often considered of lesser importance in the past. Subsequent prudential and regulatory responses that followed the crisis entirely renewed the way in which Asset Liability Management is run. In response to these regulatory initiatives, the CIBFM and ALM-Vision developed a workshop to encourage its banking members to actively develop management of structural and liquidity risk affecting the balance ...
