Magnetic resonance imaging (MRI) is the most technically dependent  
imaging technique in radiology. To perform and interpret MRI studies  
correctly, an understanding of the basic underlying principles is  
essential. Understanding Magnetic Resonance Imaging explains the pulse  
sequences, imaging options, and coils used to produce MR images,  
providing a strong foundation for performing and interpreting imaging  
studies. The text is complemented by more than 100 figures and 25  
photomicrographs illustrating the techniques discussed. Radiology  
residents, MR technologists, and radiologists should not be without  
Understanding Magnetic Resonance Imaging—the only single resource that  
explains all technical aspects of MRI, including recent advances, and  
presents all imaging options.

Every family should have financial goals for the future. Being  
unprepared can lead to monetary chaos. Financial Management of Your  
Future deals with strategies for accomplishing financial goals. What  
investment returns are necessary to achieve explicit family goals? How  
are returns logically related to risks for investment opportunities  
that are considered? Can different families have different tolerances  
for experiencing investment risk? Why is asset allocation the key  
investment decision for most families? What are the characteristics  
and valuations of bonds, stocks, mutual funds, real estate and  
international securities that a family might consider? How should a  
family construct, monitor, and revise a portfolio of investments over  
time? How should careful estate planning be done by a family in order  
to delay or avoid taxes in passing on property to their children,  
grandchildren, and favorite charities? And how can some of the

concepts and techniques from "modern portfolio theory" be helpful to a family as it attempts to answer these questions? This book deals with financial strategies for three adult age categories: (1) Families of ages twenty to forty in the earlier years of active employment, child raising, and the beginning of saving for retirement; (2) Families of ages forty to sixty in their years of maximum income, high educational expenses for their children, and more serious thinking about forthcoming retirement; and (3) Families of ages sixty to eighty having retired or approaching full retirement.

An introduction to the scientific method as applies to market research and analysis. Dr. Lyndon O. Brown was Professor of Marketing and Advertising, Northwestern University; and Vice-President in charge of Research, Foote, Cone & Belding.

For more than 30 years, this two-volume set has helped prepare graduate students to use partial differential equations and integral equations to handle significant problems arising in applied mathematics, engineering, and the physical sciences. Originally published in 1967, this graduate-level introduction is devoted to the mathematics needed for the modern approach to boundary value problems using Green's functions and using eigenvalue expansions. Now a part of SIAM's Classics series, these volumes contain a large number of concrete, interesting examples of boundary value problems for partial differential equations that cover a variety of applications that are still relevant today. For example, there is substantial treatment of the Helmholtz equation and scattering theory?subjects that play a central role in contemporary inverse problems in acoustics and electromagnetic theory.
