The Routledge Handbook of English Language Teacher Education provides an accessible, authoritative, comprehensive and up-to-date resource of English language teacher education. With an overview of historical issues, theoretical frameworks and current debates, this handbook provides unique insights into a range of teacher education contexts, focusing on key issues relating to teacher and learner priorities, language and communication, current practices, reflective practice, and research. Key features include: a cross-section of current theories, practices and issues, providing readers with a resource which can be used in a variety of contexts; the use of data, transcripts and tasks to highlight and

illustrate a range of practices, including examples of 'best practice'; 'snapshots' of ELTE from a number of contexts taken from all around the world; and examples of current technological advances, contemporary thinking on reflective practice, and insights gained from recent research. This wide-ranging and international collection of chapters has been written by leading experts in the field. The Routledge Handbook of English Language Teacher Education is sure to be core reading for students, researchers and educators in applied linguistics, TESOL and language education.

This volume examines the theoretical and practical issues related to mentoring/peer mentoring as a support and development strategy for both pre-service and in-service language teachers, and thereby offers a practical and empirical introduction to the field. A stimulating and thorough examination of mentoring and peer mentoring, integrating theory and practice as applied in language teacher education in an Asian specific context. The author discusses findings from a variety of qualitative and quantitative research studies in the light of previous research and in the context of teacher learning theories. Teachers, teacher educators, teacher trainers, supervisory coordinators and administrators will find practical advice, while the volume will be a valuable source of research information for researchers in teacher education and EFL teacher education, in particular for those who wish to employ mentoring or peer mentoring as an approach to teachers' professional development.

TESOL Teacher Education in a Transnational World critically examines theories and practices in contemporary TESOL teacher education to shed new light on the intersection of transnationalism and language teacher education. It emphasizes the scholarship of transnational mobility of language teachers, and showcases critical research from diverse contexts. The book fills a critical research gap by more fully examining the theory and practice of teacher education in a changing time when national identities and cross-border mobilities continue to figure prominently in scholarly discussions. Through a diverse set of epistemological, historical and theoretical perspectives along with methodological innovations, contributors of this volume not only index the dynamism of the scholarship of teacher education, but they also offer new forums for lively pedagogical debates. Featuring contributions from diverse educational and geographical contexts, including Europe, Asia, North America, and Latin America, the book moves the existing scholarship forward to more fully examine TESOL teacher education in relation to transnationalism. This book will be of great interest to academics, scholars, post-graduate students, teacher educators, policymakers, curriculum specialists, administrators, and other stakeholders interested in language teacher education, TESOL and applied linguistics

Decolonizing Foreign Language Education interrogates current foreign language and second language education approaches that prioritize white, western thought. Edited by acclaimed critical theorist and linguist Donaldo Macedo, this volume includes cutting-edge work by a select group of critical language scholars working to rigorously challenge the marginalization of foreign language education and the displacement of indigenous and non-standard language varieties through the reification of colonial languages. Each chapter confronts the hold of colonialism and imperialism that inform and shape the relationship between foreign language education and literary studies by asserting that a critical approach to applied linguistics is just as important a tool for FL/ESL/EFL educators as literature or linguistic theory.

Language teacher education is widely identified as one of the most important areas that needs addressing in order to improve early language instruction, yet research into teacher education for early language teachers remains relatively sparse. This volume responds to this gap by compiling studies with diverse methodological tenets from a wide range of geographical and educational contexts around the world. The volume aims to enhance understanding of early language teacher education as well as to address the need to prepare early language teachers and assist them in their professional development. The chapters focus on the complexity of teacher learning, innovations in mentoring and teacher supervision, strategies in programme development and perceptions, and knowledge and assessment in early language learning teacher education. The volume offers comprehensive coverage of the field by addressing various aspects of teacher education in different languages. The contributions highlight examples of research into current practice in the professional enhancement of early language learning teachers, but with an emphasis on the implications for practitioners.

This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

In this much needed resource, Maryellen Weimer-one of the nation's most highly regarded authorities on effective college teaching-offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. Learner-Centered Teaching shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

The chapters in this volume outline and discuss examples of teacher educators in diverse global contexts who have provided successful self-initiated innovations for their teacher learners. The collection suggests that a way forward for second language teacher preparation programs is through 'reflective practice as innovation'.

"2 full-length exams with detailed explanations"--Cover.

This interdisciplinary book offers a critical analysis of Thai education and its evolution, providing diverse perspectives and theoretical frameworks. In the past five decades Thailand has seen impressive economic success and it is now a middle-income country that provides development assistance to poorer countries. However, educational and social development have lagged considerably behind its globally recognized economic success. This comprehensive book covers each level of education, such as higher and vocational/technical education, and such topics as internationalization, inequalities and disparities, alternative education, non-formal and informal education, multilingual education, educational policy and planning, and educational assessment. The 25 Thai and 8 international contributors to the volume include well-known academics and practitioners. Thai education involves numerous paradoxes, which are identified and explained. While Thailand has impressively expanded its educational system quantitatively with much massification, quality problems persist at all levels. As such, the final policy-oriented summary chapter suggests strategies to enable Thailand to escape "the middle income trap" and enhance the quality of its education to ensure its long-term developmental success.
