WINNER OF THE 2018 JOHN BURROUGHS MEDAL FOR OUTSTANDING NATURAL HISTORY WRITING “ Both a love song to trees, an exploration of their biology, and a wonderfully philosophical analysis of their role they play in human history and in modern culture. ” —Science Friday The author of *Sounds Wild and Broken* and the Pulitzer Prize finalist *The Forest Unseen* visits with nature ’ s most magnificent networkers — trees David Haskell has won acclaim for eloquent writing and deep engagement with the natural world. Now, he brings his powers of observation to the biological networks that surround all species, including humans. Haskell repeatedly visits a dozen trees, exploring connections with people, microbes, fungi, and other plants and animals. He takes us to trees in cities (from Manhattan to Jerusalem), forests (Amazonian, North American, and boreal) and areas on the front lines of environmental change (eroding coastlines, burned mountainsides, and war zones.) In each place he shows how human history, ecology, and well-being are intimately intertwined with the lives of trees. Scientific, lyrical, and contemplative, Haskell reveals the biological connections that underpin all life. In a world beset by barriers, he reminds us that life ’ s substance and beauty emerge from relationship and interdependence.

“ A symphony, filled with the music of life. ” —Elizabeth Kolbert, author of *The Sixth Extinction* A lyrical exploration of the diverse sounds of our planet, the creative processes that produced these marvels, and the perils that sonic diversity now faces We live on a planet alive with song, music, and speech. David Haskell explores how these wonders came to be. In rain

forests shimmering with insect sound and swamps pulsing with frog calls we learn about evolution ' s creative powers. From birds in the Rocky Mountains and on the streets of Paris, we discover how animals learn their songs and adapt to new environments. Below the waves, we hear our kinship to beings as different as snapping shrimp, toadfish, and whales. In the startlingly divergent sonic vibes of the animals of different continents, we experience the legacies of plate tectonics, the deep history of animal groups and their movements around the world, and the quirks of aesthetic evolution. Starting with the origins of animal song and traversing the whole arc of Earth history, Haskell illuminates and celebrates the emergence of the varied sounds of our world. In mammoth ivory flutes from Paleolithic caves, violins in modern concert halls, and electronic music in earbuds, we learn that human music and language belong within this story of ecology and evolution. Yet we are also destroyers, now silencing or smothering many of the sounds of the living Earth. Haskell takes us to threatened forests, noise-filled oceans, and loud city streets, and shows that sonic crises are not mere losses of sensory ornament. Sound is a generative force, and so the erasure of sonic diversity makes the world less creative, just, and beautiful. The appreciation of the beauty and brokenness of sound is therefore an important guide in today ' s convulsions and crises of change and inequity. *Sounds Wild and Broken* is an invitation to listen, wonder, belong, and act.

In this collection of natural-history essays, biologist Joan Maloof embarks on a series of lively, fact-filled expeditions into forests of the eastern United States. Through Maloof ' s engaging, conversational style, each essay offers a lesson in stewardship as it explores the interwoven

connections between a tree species and the animals and insects whose lives depend on it—and who, in turn, work to ensure the tree ' s survival. Never really at home in a laboratory, Maloof took to the woods early in her career. Her enthusiasm for firsthand observation in the wild spills over into her writing, whether the subject is the composition of forest air, the eagle ' s preference for nesting in loblolly pines, the growth rings of the bald cypress, or the gray squirrel ' s fondness for weevil-infested acorns. With a storyteller ' s instinct for intriguing particulars, Maloof expands our notions about what a tree “ is ” through her many asides—about the six species of leafhoppers who eat only sycamore leaves or the midges who live inside holly berries and somehow prevent them from turning red. As a scientist, Maloof accepts that trees have a spiritual dimension that cannot be quantified. As an unrepentant tree hugger, she finds support in the scientific case for biodiversity. As an activist, she can ' t help but wonder how much time is left for our forests.

Daughter of the Forest is a testimony to an incredible author's talent, a first novel and the beginning of a trilogy like no other: a mixture of history and fantasy, myth and magic, legend and love. Lord Colum of Sevenwaters is blessed with six sons: Liam, a natural leader; Diarmid, with his passion for adventure; twins Cormack and Conor, each with a different calling; rebellious Finbar, grown old before his time by his gift of the Sight; and the young, compassionate Padriac. But it is Sorcha, the seventh child and only daughter, who alone is destined to defend her family and protect her land from the Britons and the clan known as

Northwoods. For her father has been bewitched, and her brothers bound by a spell that only Sorcha can lift. To reclaim the lives of her brothers, Sorcha leaves the only safe place she has ever known, and embarks on a journey filled with pain, loss, and terror. When she is kidnapped by enemy forces and taken to a foreign land, it seems that there will be no way for her to break the spell that condemns all that she loves. But magic knows no boundaries, and Sorcha will have to choose between the life she has always known and a love that comes only once. Juliet Marillier is a rare talent, a writer who can imbue her characters and her story with such warmth, such heart, that no reader can come away from her work untouched. A meditation on escaping the chaos of modern life and rediscovering the luxury of solitude. Winner of the Prix Médicis for nonfiction, *The Consolations of the Forest* is a Thoreau-esque quest to find solace, taken to the extreme. No stranger to inhospitable places, Sylvain Tesson exiles himself to a wooden cabin on Siberia's Lake Baikal, a full day's hike from any "neighbor," with his thoughts, his books, a couple of dogs, and many bottles of vodka for company. Writing from February to July, he shares his deep appreciation for the harsh but beautiful land, the resilient men and women who populate it, and the bizarre and tragic history that has given Siberia an almost mythological place in the imagination. Rich with observation, introspection, and the good humor necessary to laugh at his own folly, Tesson's memoir is about the ultimate freedom of owning your own time. Only in the hands of a gifted storyteller can an experiment in isolation become an exceptional adventure accessible to all.

By recording his impressions in the face of silence, his struggles in a hostile environment, his hopes, doubts, and moments of pure joy in communion with nature, Tesson makes a decidedly out-of-the-ordinary experience relatable. The awe and joy are contagious, and one comes away with the comforting knowledge that "as long as there is a cabin deep in the woods, nothing is completely lost."

A New York Times Notable Book for 2011 One of Entertainment Weekly's Top 10 Nonfiction Books of the Year 2011 A Time Magazine Top 10 Nonfiction book of 2011 A Boston Globe Best Nonfiction Book of 2011 One of Library Journal's Best Books of 2011 A sharp-eyed, uniquely humane tour of America's cultural landscape—from high to low to lower than low—by the award-winning young star of the literary nonfiction world. In *Pulphed*, John Jeremiah Sullivan takes us on an exhilarating tour of our popular, unpopular, and at times completely forgotten culture. Simultaneously channeling the gonzo energy of Hunter S. Thompson and the wit and insight of Joan Didion, Sullivan shows us—with a laidback, erudite Southern charm that's all his own—how we really (no, really) live now. In his native Kentucky, Sullivan introduces us to Constantine Rafinesque, a nineteenth-century polymath genius who concocted a dense, fantastical prehistory of the New World. Back in modern times, Sullivan takes us to the Ozarks for a Christian rock festival; to Florida to meet the alumni and straggling refugees of MTV's *Real World*, who've generated their own self-perpetuating economy of minor celebrity; and all across the South on the trail of the blues. He takes us to Indiana to investigate the formative years of Michael Jackson and Axl Rose and then to the Gulf Coast in the wake of Katrina—and back again as its residents confront the BP oil spill.

Gradually, a unifying narrative emerges, a story about this country that we've never heard told this way. It's like a fun-house hall-of-mirrors tour: Sullivan shows us who we are in ways we've never imagined to be true. Of course we don't know whether to laugh or cry when faced with this reflection—it's our inevitable sob-guffaws that attest to the power of Sullivan's work.
