Things I'll never forget is the story of a young high school graduate in 1965 who faces being drafted into the Army or volunteering for the Marine Corps. These are his memories of funny times, disgusting times and deadly times. The author kept a journal for an entire year; therefore many of the dates, times and places are accurate. The rest is based on memories that are forever tattooed on his brain. This is not a pro-war book, nor is it anti-war. It is the true story of what the Marine Corps was like in the late 1960's, when the country had a draft and five hundred thousand Americans were serving one year tours in battle-torn South East Asia. If you served in Viet Nam you will want to compare your experience with the author's. If you know someone who went to Viet Nam, you will want to read for yourself what it was like. If you lost a loved one or friend in the war, you will want to read this and share it with others.

This book offers, for the first time, a detailed comparative study of how speakers of different languages express memory concepts. While there is a robust body of psycholinguistic research that bears on how memory and language are related, there is no comparative study of how speakers themselves conceptualize memory as reflected in their use of language to talk about memory. This book addresses a key question: how do speakers of different languages talk about the experience of having prior experiences coming to mind (remembering) or failing to come to mind (forgetting)? A complex array of answers is provided through detailed grammatical and semantic investigation of different languages, including English, German, Polish, Russian and also a number of non-Indo-European languages, Amharic, Cree, Dalabon, Korean, and Mandarin. In addition, the book calls for a broader interdisciplinary engagement by urging that cognitive semantics be integrated with other sciences of memory.

It is painfully difficult to watch a loved one decline as dementia ravages their mind, destroying memories, rational thinking, and judgment. In her touching memoir, I Will Never Forget, Elaine Pereira shares the heartbreaking and humorous story of her mother's incredible journey through dementia. Pereira begins with entertaining glimpses into her own childhood and feisty teenage years, demonstrating her mother's strength of character. Years later, as Betty Ward started to exhibit bizarre behaviors and paranoia, Pereira was mystified by her mom's amazing ability to mask the truth. Not until a revealing incident over an innocuous drapery rod did Pereira recognize the extent of her mother's Alzheimer's. As their roles shifted and a new paradigm emerged, Pereira transformed into a caregiver blindly navigating dementia's unpredictable haze. But before Betty's passing, she orchestrated a stunning rally to control her own destiny via a masterful, Houdini-like escape. I Will Never Forget is a powerful heartwarming story that helps others know that they are not alone in their journey. "Poignant, shocking, and honest ... far more than just words on paper. If you or someone you know is living through the hell of dementia, you need this book!" —Ionia Martin, developer of Readful Things Reviews and Alzheimer's caregiver

Rather than a childhood cut short by a loss of innocence, the real crisis of the digital age may be the specter of a childhood that can never be forgotten.

On November 26, 1943 the United States sustained its largest loss of troops at sea. Over 2,000 U.S. servicemen were aboard the British troop ship HMT Rohna in the Mediterranean on their way to the China-Burma-India Theater of war. Traveling in a convoy, the Rohna and 23 other ships were attacked by German bombers. After a fierce fight that ended with no ships lost, a single bomber made a final run. Armed with the latest technology (a rocket powered, remote controlled Henschel HS-293 glide bomb), it set its sights on the Rohna. Many men were killed instantly by the direct hit. Rescue ships spent hours pulling survivors from the water. By the time the losses were totaled, 1,015 U.S. servicemen had lost their lives. During a four-year period, author Michael Walsh met with survivors at their annual reunions, sitting with them as they recorded their stories of that night. Rohna Memories: Eyewitness to Tragedy is a repository of their recollections, whenever possible in their own words. Also included are: Diagrams and photos Letters home Witness reports Tributes by relatives Lists of survivors and casualties

Five years after running away from home, where he had taken all the physical abuse that his father would had given his younger sister Alyssa, who mattered more to him then his very soul, David Brooks spent those years out on the streets as a child prostitute from age fifteen to twenty, living with and falling in love with his female pimp; he meets a witch, who turns him into a memory-shattered brown fox, who increases in sexual hunger with each human memory he regains. After being taken to his father's animal mating lab, he's reunited with a now eight-year-old Alyssa, who has grown a lot over the five years of abuse from their father and neglect from their mother; she tries to help him regain all his human memory before his mating date, with the last human memory being the most powerful one . . . a bracelet, which held the strongest promise David ever made Alyssa, since it stayed true the moment he had been changed into the brown fox with her name being the only human memory that never left him: "As long as you wear this, you'll never forget me, and I'll never forget you."

Have you ever wondered what happens after you pass from this life into the next? Some may say there is no next, and others would say, you just fall asleep and wake up in heaven. I have heard others say you go to a different world or you are born again into this world. The following short stories are experiences certain individuals might have. Though seemingly impossible to some, and maybe so, but the stories themselves can apply to anyone. The names, places, and circumstances are fictional.
