Jake never really left.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Most macroeconomists agree that we live in the age of microfoundations. The recent worldwide financial crisis may have emboldened critics of this microfoundational orthodoxy, but it remains the dominant view that macroeconomic models must go beyond supply and demand functions to the level of individual decision-making, taking into account the general dynamic environment where agents live. *Microfoundations Reconsidered* seeks to reassess how the relationship of micro and macroeconomics evolved over time. The highly regarded contributors to the book argue that the standard narrative of microfoundations is likely to be unreliable. They therefore re-examine the history of the relationship of microeconomics and macroeconomics, starting from their emergence as self-consciously distinct fields within economics in the early 1930s. They seek to go beyond the conventional history that is often told and written by practicing economists. From different perspectives they challenge

the association of microfoundations with Robert Lucas and rational expectations and offer both a more complete and a deeper reading of the relationship between micro and macroeconomics.

Microfoundations Reconsidered is a valuable addition to the macroeconomic research literature. It is ideally suited to students, scholars, researchers, and practitioners with an interest in macro and microeconomics and the history of economics.

Consummate home cook and magazine editor Suzanne Gibbs shows us how to use a pressure cooker to create slow-cooked flavour in a fast-paced world. Pressure cookers allow us to cook quickly, cheaply and efficiently. The food is cooked in liquid at high temperatures, which shortens cooking time by up to 70 per cent. Because the method seals in flavour and nutrition, cheaper ingredients can be used to great effect. Here Suzanne selects more than 80 of her favourite pressure-cooker recipes, and describes the process from beginning to end. Learn how to cook an osso bucco in 25 minutes, a chicken tagine in 15 minutes and a delicious bread and butter pudding in 20 minutes. Packed with information on practicalities, such as choosing, using and cleaning your cooker, and fully illustrated with beautiful photography. The Pressure Cooker Recipe Book is a must-have guide for anyone balancing the constraints of time and money with a desire to create delicious healthy meals for themselves, their friends and their families.
