When all forms of energy are considered, conservation of energy is written in

Online Library Visual Physics Conservation Of

Equation form as $KE_i + PE_i + W_{nc} + OE_i = KE_f + PE_f + OE_f$, where OE is all other forms of energy besides mechanical energy. Commonly encountered forms of energy include electric energy, chemical energy,

The law of conservation of energy is a fundamental concept that is used in

Energy Momentum fields.

Concepts such as kinetic energy and gravitational potential energy are used in designing cranes, elevators and roller-coaster rides.

systems. A ball rolling
across a rough floor will
not obey the law of
conservation of energy
because it is not isolated
from the floor. The floor
is, in fact, doing work on
the ball through friction.

However, if we consider the ball and floor together, then conservation of energy will apply.
